

To Whom It May Concern:

My name is Dilara Islam and I am a senior mathematics major in the Levermore Global Scholars Program. The Levermore Global Scholars Program (LGS) seeks to enrich students with an interdisciplinary global perspective through seminars and a variety of co-curricular activities. Ultimately, the program offers students a unique opportunity to acquire and expand his/her global knowledge, civic awareness, and leadership skills. You can click [here](#) to learn more about the program.

LGS students, with the help of administration, have undertaken the task of creating the first undergraduate research journal that showcases research that is currently being conducted by professors and students across all disciplines. I am reaching out to inquire whether you, or members of your faculty, are currently working on research with undergraduate students that could be published in the research journal. If this applies to you or a member of your department, please write, or have him/her write, a one-page synopsis describing the research that is being conducted. In the synopsis please include:

- Professor/ Students working on research
- Topic/Name of research
- Date of completion/ expected date of completion
- Description of research being conducted

The synopsis can be sent to thornburg@adelphi.edu. If accepted, submissions will be peer reviewed by seniors in the related discipline before being published into the journal. We want to offer a diverse range of disciplines in our research journal so we encourage all to submit a proposal and we encourage the submission of art or video-based work.

I look forward to hearing from you.

Best regards,
Dilara Islam
