Quick Guide: Recoding a Podcast on Android

Recording Podcasts on Android

Note: Although there many free recording apps available, the one we will be using in this tutorial is Smart Voice Recorder, which is designed to work on any android device.

Before you begin the tutorial, be sure to download this app from the Google Play Store.

1. Select “Start Recording”

2. Select “Finish” (note: you can also pause, and begin again if desired)
3. Name Your Recording

4. Select the down arrow to for advanced options such as sharing

5. Select “Share…”

6. Choose your sharing option. It is recommended you share your audio file using Google drive. This way, you are not subject to strict file size limits, and your audio will automatically be saved to your drive for later access on any other device.
