Doctoral Student Handbook

2026-2027

School Psychology Program
Gordon F. Derner School of Psychology
158 Cambridge Avenue
Garden City, NY 11530

Accreditation Status: The Doctoral Program in School Psychology at The Derner School of Psychology at Adelphi University has completed the Intent to Apply forms and has just submitted documents in response to questions by APA in support of its application for Conditional Accreditation. It is expected that the APA will inform the program of its accreditation decision by the end of the Fall semester.

INTRODUCTION AND HISTORY OF SCHOOL PSYCHOLOGY AT DERNER

Biography: Gordon F. Derner (1915-1983)

Gordon F. Derner was born on April 9, 1915, in Buffalo, New York, the older of two children. He finished high school at age 15 but was too young to go to college, and so he spent a year doing graduate work at his sister Gwynevere's high school. He then spent a year at Grosvenor Junior College and two years at Buffalo Collegiate Center. Before he was 20-years old, he had two bouts with tuberculosis, both occurring while he was in college. After the second episode, his physician instructed him not to return to school until the disease was cured, a process that required two hospitalizations in local sanatoriums. The disease ravaged his lungs, presaged his chronic emphysema, and eventually took his life.

It was during this period that Gordon entered the phase of life that he nostalgically referred to as his time in show business. He served as business manager for a neighborhood friend who performed a high wire act; Gordon also filled in as a ringmaster in traveling circuses. It should come as no surprise to those who followed his later career that he spent time as a ringmaster for a high wire act, and much of the time he seemed to be working, successfully, with no net. It was also during this time that he discovered cowboy boots, initially worn for their functional utility, but later became his unmistakable trademark.

The year 1942 was a memorable one for Gordon Derner. At the age of 27, with the tuberculosis seemingly arrested, he returned to what is now known as the State University College of Buffalo, where he completed his undergraduate degree, and forty years later received their Distinguished Alumnus Award. On September 17, 1942, Gordon married Margaret Rafter, and the two were inseparable companions for the remainder of his years. As widely as Gordon traveled, professionally and personally, he traveled nearly exclusively with Margaret and, later, their son, Kurt, for this man of the world was, first and foremost, a family man.

Following their wedding, Gordon and Margaret left by bus for New York and Columbia University. His years at Columbia were a source of great pride for him, and he spoke with wide-eyed enthusiasm of his time there. It was at Columbia that Gordon met and first worked with Bruno Klopfer, a man he referred to as his mentor and whose picture was always on his desk. Thus, it was a particular satisfaction when the Society for Personality Assessment, of which Gordon had been president, bestowed upon him the 1982 Bruno Klopfer Distinguished Contribution in Personality Assessment Award. Gordon also became president of the Columbia Graduate Club, where he arranged for Eleanor Roosevelt to address the club. Unfortunately, Gordon missed the occasion because he had again been hospitalized again with tuberculosis. He served as an instructor at Columbia while completing his Ph.D., which he earned in 1950. His first son, Jonathan, died the same year at the age of 10 days after surgery for an obstructed bowel. A number of years later that it was revealed that the Jonathan had cystic fibrosis, the disease that would also eventually claim the life of his second son, Kurt.

Although Gordon probably would have remained happily at Columbia for the remainder of his career, an economic frozen job structure forced him to look elsewhere for employment. A position at Adelphi College was recommended to him by Len Goodstein. Gordon's first question was, "What's Adelphi?" and he spent the remainder of his life trying to ensure that no one else would ever ask that question. He was appointed as an assistant professor at Adelphi College in 1951, with

the task of forming a clinical training program. He eventually became Dean of the Derner Institute of Advanced Psychological Studies at Adelphi University.

Remarkably, the small college with no doctoral programs or tradition to speak of spawned a clinical training program that was fully accredited by the American Psychological Association before the decade was out. Gordon Derner was recognized when he was elected the founding president of the National Council of Schools of Professional Psychology.

It seemed that Gordon could not belong to an organization without having his leadership qualities recognized by election to its presidency, serving as President of myriad local, state, and national associations (i.e., Nassau County Psychological Association, the New York State Psychological Association, the American Psychological Association's (APA) Division of Clinical Psychology). His service was recognized by Division 29 of the APA in 1979 through the receipt of the Division's *Distinguished Professional Psychologist of the Year Award*.

Possibly Gordon Derner's greatest contribution to psychology was as a university administrator and teacher. More than 400 graduates of the Adelphi program owe their careers to his vision, as well as hundreds of graduates of other university professional programs that followed Adelphi's lead. Gordon took great pride in his students. He glowed as he spoke of their accomplishments. Curiously, although his program was decidedly professional in orientation, his kindest words were reserved for graduates such as Marcia Guttentag and Paul Ekman, who earned reputations for their research contributions. He also took great pride in professionally oriented graduates, such as Nick Cummings and Mel Gravit. He had the capacity to see and value the accomplishments of a graduate who returned to the community, offered services in a quietly competent manner, and was unknown outside of the community. When student evaluation meetings would question the candidacy of a particular student, he would often remind colleagues that every distribution has to have a bottom and that did not mean the person at the bottom was not a potentially valuable psychologist. Nothing seemed more painful to Gordon than dismissing a student from the program, an outcome that was rare because of the encouragement and support he offered. His concerns extended to minority students, and he was an ardent champion of their cause. His influence led Adelphi to an admissions policy designed to seek minority students, provide support for them, and help them graduate. Large numbers of black, Hispanic, and foreign students have been educated at Adelphi, and they always found Gordon to be a friend and supporter.

Although his professional career centered on Adelphi, his professional scope was international. A world traveler who visited every state and 52 countries on six continents, his attention was drawn to the Peace Corps. He also consulted with the Japanese government about the possibility of establishing a Japanese version of the Peace Corps.

Gordon was a clinical psychologist who practiced what he preached. His clinical skills were recognized in two areas of practice in which he earned diplomate status (clinical and hypnosis). He was also named a charter laureate of the National Academy of Practice. Originally trained in psychoanalysis at the William Alanson White Institute, his clinical interests and skills extended well beyond. He was a practitioner of hypnosis, family therapy, sex therapy, and biofeedback long before those approaches became popular. His later interest in biofeedback led to the development of a laboratory and clinic at Adelphi, established in conjunction with the neighboring Franklin General Hospital. His interests in hypnosis and biofeedback converged into a successful approach toward habit control, particularly helping people stop smoking.

Gordon Derner died quietly, of respiratory arrest, at his home in San Diego on September 11, 1983, just a few days short of the death of his beloved son. He lived a life filled with illness and tragedy,

yet thrived despite his circumstance. He was as vibrant, optimistic, and generous of spirit as any person could be, attracting friends and admirers wherever he went. At the memorial service held at Adelphi, faculty reiterated a phrase used by Roger Kahn to eulogize Jackie Robinson, another charismatic pioneer. “He did not merely play at center stage, he was center stage, and wherever he walked, center stage walked with him.”

When Gordon Derner came to Adelphi, it was a small liberal arts college with no doctoral tradition. When he died, the College housed an APA-approved program in clinical/school psychology, a program in human psychology research, and an opportunity for students to combine the two in a clinical/research program. Moreover, the College offered a re-specialization certificate program and a postdoctoral psychotherapy program, which offered certificates in psychotherapy and psychoanalysis, group psychotherapy, and child and adolescent psychotherapy. The university mourned his loss and expressed its recognition of his leadership by renaming the school he founded the Gordon F. Derner Institute of Advanced Psychological Studies, currently known as the Gordon F. Derner School of Psychology [Stricker, G. (1985). Obituary: Gordon F. Derner. *American Psychologist*, 40 , 368-369].

Psychologist’s Oath

In his early days as Dean of the Derner Institute, Gordon Derner began the practice of having all incoming first-year students, as well as the Dean and Associate Dean, read “The Psychologist’s Oath” aloud during Orientation Day. The practice is as valuable today as it was forty years ago; it is an appropriate reminder of the essential nature of the profession of psychology, its relevance to the human condition, and the demands required of its practitioners.

As I embark on a career as a psychologist, I vow to respect the dignity and worth of the individual and honor the preservation and protection of fundamental human rights. I will be committed to increasing knowledge of human behavior and of people’s understanding of themselves and others and to utilize such knowledge for the promotion of human welfare. While I pursue these endeavors, I will make every effort to protect the welfare of those who seek my services or of any human being or animal that may be the object of my study. I will use my skills only for purposes consistent with these values, and will not knowingly permit their misuse by others. While demanding for myself freedom of inquiry and communication, I accept the responsibility this freedom requires: competence, objectivity in the application of skills and concern for the best interests of clients, patients, colleagues and society in general. I accept with pride these commitments I have made and will cherish this day of entry into the profession of psychology.

History of the Derner Institute

The Gordon F. Derner Institute of Advanced Psychological Studies of Adelphi University is the first university-based professional school in psychology. It combined the graduate doctoral programs in clinical psychology and applied experimental psychology. Adelphi University, then Adelphi College, began doctoral education in psychology in 1950, and in 1951 formally organized the clinical psychology/school psychology program.

In 1957, the clinical psychology program was accredited by the American Psychological Association. In 1966, the Department continued as a division of the College of Arts and Sciences responsible for undergraduate psychology and the master's and doctoral programs in general experimental psychology. The Derner Institute of Advanced Psychological Studies was responsible for doctoral programs in clinical/school psychology, applied experimental psychology (Human Psychology Research Program), and the postdoctoral program in psychotherapy and psychoanalysis, which was established in 1963. The Derner Institute functioned as a department of the Graduate School of Arts and Sciences until 1972, when it became an autonomous professional school and its Director became its Dean. In 1984, the Derner School of Psychology was renamed in memory of its founding Dean, and Dr. George Stricker, the Assistant Dean since the founding of the Derner Institute, was named Dean. Dr. Stricker retired as Dean of the Derner Institute in 1992, and Dr. Robert Mendelsohn was appointed Dean, followed by Dr. Louis H. Primavera in August 2000, and Dr. Jean Lau Chin in 2006. In 2011, Dr. Jacques P. Barber was appointed the sixth Dean of the Derner Institute.

In 1998, the Department of Psychology separated from the School of Arts and Sciences, and became part of the Derner Institute. As a result, the Derner Institute began to offer an undergraduate major in psychology and B.A. students have had since then, the opportunity to receive a methodologically strong, data-based major in general psychology that is enriched by the contributions of the Derner Institute's doctoral faculty.

In 2002, the Derner Institute introduced an MA program in School Psychology. The program consists of 72 credits and leads to the Advanced Certificate in School Psychology. The program which has a cohort target of twenty students per year, also offers students the opportunity to pursue bilingual certification in school psychology. The program was nationally accredited in 2012 by the National Association of School Psychologists and its accreditation was renewed in 2016. Apart from the bilingual specialization, the MA program in school psychology also offers a specialization in Autism.

The Derner School of Psychology

In recognition of the growth of Derner, which by 2014 had a BA program, 3 MA programs (School Psychology, Mental Health Counseling and General Psychology) a Ph.D. program (in Clinical Psychology), and a long-standing postgraduate program, the faculty unanimously voted to change the name of the School from Derner Institute of Advanced Psychological Studies to the Gordon F. Derner School of Psychology.

In 2018, another doctoral training program began at the Derner School. The Psy.D. Program in School Psychology started in the Fall of 2018, with a cohort of 15 students. The program offers two tracks of study, a track for candidates with a BA degree, and an Advanced Standing track for candidates who already hold an Advanced Certificate in School Psychology. The track for candidates with a BA degree consists of 110 credits, while credits for students in the Advanced track can range depending on the courses they have completed before being admitted to the program.

Today the internationally renowned, Gordon F. Derner School of Psychology is comprised of undergraduate psychology and neuroscience majors, master-level education in school psychology, mental health counseling, and general psychology, doctoral training in clinical psychology (Ph.D.) school psychology (Psy.D.), and postgraduate programs in psychoanalytically informed interventions, and specifically, in psychoanalytic psychotherapy, child and adolescent psychotherapy, marital therapy and group psychotherapy.

Faculty

Jordan Bate, Ph.D (The New School) is an Associate Professor and leads the Attachment & Psychotherapy Process Lab. Her primary research interests are in the applications of attachment theory and mentalization to psychotherapy process research with children, adolescents and parents, and in training clinicians. She teaches classes in child intake and psychotherapy and evidence based psychodynamic approaches. She is on the voluntary faculty of Lenox Hill Hospital, where she was involved in establishing the Reproductive Mental Health Program, and is now co-investigator on a pilot study of Mentalization Based Treatment for Children and Young People (or MBT-C). She is a trainer in MBT-C and co-authored two books: *Working With Parents in Therapy: A Mentalization-Based Approach*, and *Deliberate Practice in Child and Adolescent Psychotherapy*. She is chair of the Child, Adolescent and Family Therapy Research Special Interest Group of Society for Psychotherapy Research, and past-president of Section II, the child and adolescent section of APA Division 39, Society for Psychoanalysis and Psychoanalytic Psychotherapy. She also maintains a small private practice in Manhattan.

Susan Farella Bush, Ph.D. (The Graduate School and University Center of the City University of New York, 2003) is a highly experienced Clinical Neuropsychologist and Assistant Teaching Professor at Adelphi University in the Gordon F. Derner School of Psychology. Licensed since 2003, she has a strong clinical background, having worked in private practice and as a Consulting Supervisor at Adelphi University's Clinic for Psychological Services. In these roles, she has conducted comprehensive neuropsychological assessments and provided therapy for a variety of disorders. Dr. Farella-Busch also has extensive teaching experience, currently teaching advanced courses to Doctoral and master's students such as Diagnostic Assessment, Biological Bases of Behavior, and Clinical Neuropsychology. Dr. Farella-Busch has presented neuropsychological topics and contributed to research, including studies on memory and cognitive impairment. She is also actively involved in academic service and dissertation committees.

Naama Gershby, Ph.D. (Long Island University, Brooklyn, 2014) is an Associate Professor of clinical and school psychology at Adelphi University. She earned her MA in child clinical and school psychology at Tel Aviv University, Israel before completing her Ph.D. in clinical psychology at LIU, Brooklyn. Following her doctoral studies, she served as a postdoctoral fellow at Yale University Child Study Center, at the Albert Solnit Psychiatric Center and specialized in post-trauma and system-based work with the New Haven Police Department, and served for eight years as a Lecturer and Senior Lecturer of child clinical and school psychology at the Hebrew University of Jerusalem. Dr. Gershby's research primarily focuses on parenting and seeks to understand the factors that contribute to parents' ability to respond sensitively, compassionately, and adaptively to their children. Using a mentalization frame she investigates the dynamics that lead to hostile and coercive parenting, as well as the factors that facilitate parental availability to meet and respond to children's needs and their ability to regulate both their own and their child's negative emotions. Currently, Dr. Gershby's research focuses on studying parenting processes related to raising children with ADHD, the impact of parental involvement in homework on the children's academic progress, and the challenges and consequences of parenting in the digital age, where screen use and digital media play a significant role. Her scientific work aims to bridge the gap between developmental science, parenting-based interventions, and policy and to develop evidence-based interventions to support and assist parents.

Christy Mulligan, Psy.D (Philadelphia College of Osteopathic Medicine, 2012) is Assistant Professor and Director of the Master's program in School of Psychology at Adelphi University in the School Psychology Psy.D and M.A. Programs. Dr. Mulligan has worked as a school psychologist in both Pennsylvania and New York for 8 years prior to entering academia. Her research is focused in the area of selective mutism, specifically how different presentations of the disorder may influence treatment. This topic was the focus of her dissertation, and she has published and presented on the topic extensively. Her other area of research is on sexually harmful youth, focusing on the misunderstandings of this population, coupled with the unfair treatment they may receive in the criminal justice system, and resulted in a monograph on the topic published

by Springer Press. Dr. Mulligan has a strong social justice lens and consistently advocates for equity in systems that have been overwhelmed with bias.

Rachell Pierre-Louis, Psy.D. (Fairleigh Dickinson University, 2018) is a Lecturer at the Derner School of Psychology at Adelphi University. She earned her M.S. degree at St. John's University and her Psy.D. in School Psychology at Fairleigh Dickinson University. She has worked as a bilingual School Psychologist for over 13 years, serving diverse school districts in Brooklyn and Uniondale, New York. Behavior management, including assessments and interventions to support students with behavioral/emotional challenges, is one of her areas of expertise. Her dissertation which was entitled "General Education Teachers and Special Education Decisions" focused on educational inclusivity for students with challenging behaviors. Her advocacy for students with special needs and her drive to ensure that all students are afforded a dignified and inclusive educational experience is a mission that she holds dear to her heart.

Ionas Sapountzis, Ph.D. (New York University, 1990) is a Professor at the Derner School of Psychology of Adelphi University and the director of its School Psychology program. He is a faculty member and supervisor in the Psychoanalytic Psychotherapy and in the Child, Adolescent and Family Psychotherapy programs of the Derner School of Psychology. His articles have been published in the journals of Psychoanalytic Psychology, Psychoanalytic Review, Psychoanalytic Perspectives, Psychoanalysis, Culture and Society and in the Journal of Infant, Child and Adolescent Psychotherapy (JICAP). He has worked with emotionally disabled children and students in the spectrum in school and community settings and maintains a private practice in Garden City, New York.

Gaston Weisz, Psy.D., (Pace University, 1991) is the Director of Field Placements in the School Psychology Psy.D. Program at Derner School of Psychology, Adelphi University. Dr. Weisz teaches in both Psy.D. and M.A. School Psychology Programs. He received his Psy.D. in School Community Psychology at Pace University and his M.S.Ed. in Marriage and Family Counseling at Queens College, CUNY. Professional experiences included being a school psychologist at Valley Stream Union Free School District 13, as well as clinical practice with children, adolescents and adults in Lynbrook, NY. Areas of interest include evidence-based practices in schools to address social, emotional and behavioral needs, as well as responsiveness to diversity and LGBTQ+ needs. Presentations have included School- Wide Positive Behavioral Interventions and Supports, inclusive practices in schools, responding to cultural and linguistic diversity in schools, charting behavioral data using excel, use of apps to support social emotional functioning of children with ASD, and the ethical practices of school psychologists who work in states with legal restrictions on promoting information supportive of LGBTQ+ students (i.e., no promo homo laws). Dr. Weisz has published on the topics of administrative pressure leading to burnout in psychologists, as well as psychologists' preferred strategies for coping with such pressure

Associate Faculty: Drs. Michael O'Loughlin, Katherine DeMeo Kusterer, Kirkland Vaughans, Nicole Daisy Etienne, Lillian McGovern, Alexandra McGlashan, Betti Stanco, Devin Thornburg.

PROGRAM PHILOSOPHY AND EDUCATION MODEL

The Adelphi University School Psychology philosophical and educational models of training are born within an ecological framework in which research and teaching are guided by advancing social justice for all children through science, practice, and policy. The ecological model suggests a structure for the training of practitioner-scientists who understand and practice psychology in a sociocultural context that allows for the conceptualization of relationships among various aspects of the individual (i.e., biological, cultural, and relational), in numerous forms of social organizations (i.e., families, schools, neighborhoods, communities, vocational settings) and through multiple structural influences (i.e., socioeconomic factors, social policy, reward systems). The program promotes an understanding of the systematic approach of human and social development and aspires to graduate school psychologists who think systemically and are aware of the profound impact culture and the environment have on the learning and emotional health of children. This framework allows faculty to point to how influenced the children's development is by biological factors, the immediate environment, and the interplay of the larger environment, and how media, school, and state, and federal policies, can play a major role in the learning experiences children have.

SCHOOL PSYCHOLOGY PROGRAM MISSION STATEMENT

The course of study in the School Psychology doctoral program at Adelphi University prepares students to meet the increasingly diverse responsibilities of school psychologists in an increasingly diverse society. Emphasis is placed on important content areas that contribute to the development of competencies with an understanding and respect for individual differences and human diversity. Our developmental and competency-based, practitioner-scientist course of study ensures that student learning is appropriately sequenced and integrated into relevant practical experiences. The program's mission embodies a commitment to work from an ecological and social justice perspective, and to promote an understanding a child's development through the lens of a larger socio-cultural context. This training is intended to extend students' awareness, knowledge, and expertise to address the needs of all children and families, regardless of their particular status. In addition, the program is designed to acquaint students with the diversity of theories and practices of school psychology, allowing the student sufficient intellectual freedom to experiment with different delivery systems and various theoretical bases. Emphasis is also given in being mindful of the children's subjective states and experiences with others and how their reactions and coping mechanisms can affect their learning and adjustment.

Given this mission, the program aims to ensure that a) all students are knowledgeable and competent in research and scientific-backed practice, particularly as it relates to school psychology, b) are competent in the practice of health service psychology and, c) are competent in the practice in the specialty area of school psychology. These aims facilitate preparation of health service psychologists who will practice in educationally related settings and meet the professional employment demands for psychologists in schools and in child treatment agencies, hospitals and private practice, and for psychoeducational research and mental health research specialists in child psychology.

PROGRAM AIMS, GOALS AND COMPETENCIES

The three primary goals of the doctoral program are professional characteristics, academic knowledge, and practitioner competencies are overarching, interrelated, and inextricably linked. The faculty consider these goals as fundamental to promoting the reciprocity between science and school psychological practice. As mentioned previously, the Psy.D. Program in school psychology is designed to prepare students for the practice of health service psychology based on the scientific method, and to promote the commitment to a career of highly skilled and competent practitioners whose professional activities are grounded on a foundation of a strong research background, directed toward the advancement of psychological science. Given this mission, the doctoral program aims to: a) prepare psychologists who are competent researchers (Aim 1); prepare health service psychologists who use culturally-responsive, evidence-based approaches to assessment, intervention, and consultation for effectively serving individuals from all cultural, ethnic, and socioeconomic backgrounds (i.e., Aim 2); and b) prepare psychologists who are knowledgeable and competent in the specialty area of school psychology (i.e., Aim 3). These aims facilitate preparation of health service psychologists who will practice in educationally related settings and meet the professional employment demands for: psychologists in schools; mental health specialists in child psychology; psychologists in child treatment agencies, hospitals, and private practice; and professionals in higher education committed to preparing educators and clinicians in psychoeducational services.

Beyond formal coursework, Adelphi School Psychology doctoral students are encouraged to be involved in faculty research endeavors. Opportunities, support, and encouragement for student publications and presentations at national meetings is provided throughout the students' program. Students' participation in research activities is complemented by active involvement in faculty research labs and experiential opportunities designed to inculcate an early adoption and integration of theory and practice. The specific Program aims follow.

Aim 1: To graduate school psychologists with foundational knowledge in psychology

Research

- Students will critically review, interpret, and apply various research methodologies to scholarly activities.
- Students will competently apply psychological research to practice

Foundational Knowledge

- Students will demonstrate competence on developmental, systemic, social, biological, and cognitive and affective perspectives in psychology.

Aim 2: To prepare health service psychologists who use culturally-responsive, evidence-based approaches to assessment, intervention, and consultation for effectively serving individuals from all cultural, ethnic, and socioeconomic backgrounds [Broad and general preparation for entry-level practice]

Ethical and Legal Standards

- Students will be knowledgeable of and act in accordance with the APA Ethical Principles of Psychologists and Code of Conduct.
- Students will demonstrate sound decision-making processes to resolve ethical dilemmas.
- Students will conduct themselves in an ethical manner in all professional activities.

Individual and cultural diversity

- Students will work effectively with diverse individuals and groups.

Communication and interpersonal skills

- Students will develop and maintain effective relationships with a diverse range of individuals (e.g., colleagues, supervisors, supervisees, clients), communities, and organizations.
- Students will demonstrate clear oral, written, and non-verbal communication.
- Students will demonstrate strong interpersonal skills and effectively manage difficult communications.

Supervision

- Students will demonstrate knowledge of supervision models and practices.

Professional Values and Attitudes

- Students will deport themselves with integrity, professional behavior, professional identity, accountability, and espouse concern for the welfare of others.
- Students will demonstrate competence in engaging in activities designed to maintain and improve their professional performance, well-being, and effectiveness.
- Students will demonstrate openness and responsiveness to feedback and supervision.

Aim 3: To prepare psychologists who are knowledgeable and competent in the specialty area of school psychology [Broad and general preparation for practice in school psychology]

Assessment

- Students will select and apply appropriate and psychometrically sound instruments when evaluating students.
- Students will competently interpret assessment findings.
- Students will effectively communicate test results to various individuals and stakeholders.

Intervention

- Students will competently select evidence-based interventions for academic, behavioral, social and emotional functioning.
- Students will competently monitor and evaluate data and intervention effectiveness.

Consultation and interprofessional interdisciplinary skills

- Students will competently employ the consultation process, including problem solving, interpersonal influence, and implementation support skills.

STUDENT ADMISSIONS

General prerequisites for graduate study in the program include undergraduate and/or previous graduate preparation in psychology, education, or related disciplines. Additional training and experience in special education, sociology, or human development are desirable but not mandatory. The application of previous graduate coursework to the fulfillment of various requirements should be discussed with the student's advisor and is decided on a case-by-case basis. Multiple admissions criteria are employed in the selection of students, and include the following: 1) **Official** application form; 2) **Official** transcripts of all previous undergraduate and graduate work; 3) Letters of recommendation from three individuals qualified to evaluate the applicant's personal, ethical, and academic/professional qualifications for graduate study; 4) A curriculum vita; and 5) A well written, clearly articulated personal statement. The Doctoral School Psychology Faculty and the Derner School of Psychology are committed to practices of affirmative action and equal educational opportunity in admissions decisions.

The general admission guidelines are as follows:

- A minimum GPA of 3.5 (on a 4.0 scale) is strongly preferred
- A well written, clearly articulated personal statement
- A CV
- 3 Strong letters of recommendation

The School Psychology Doctoral Program has a once-a-year admissions policy. All application materials (including Graduate Record Examination scores) must be submitted to PSYCAS by December 1st. No students are admitted to the program on a provisional status. Preference for admission will be given to applicants who intend to pursue full-time graduate study. Generally, applicants' credentials are reviewed in January, and applicants will be notified of the status of their applications by late February. Applicants are required to respond to the program's offer of admission to the Psy.D. Program by April 15th.

Candidates entering the doctoral program without an MA or Ed.S. are required to complete 110 credits in psychology, while candidates with an MA or Ed.S. degree in from a NASP-approved school psychology program will be required to register for all the courses that are not in their MA transcripts. All student applications are reviewed according to the admissions criteria rubric, and when a student is accepted into the doctoral program their course of study is tailored to facilitate obtaining the advanced degree. More specifically, doctoral students with a graduate degree and certification from an approved program in School Psychology typically have and are credited for coursework that is similar to the coursework that is required by the Adelphi University's doctoral program. Under the circumstances of admitting advanced students, the faculty advisor and program director review the transcript of the entering doctoral student and request copies of the syllabi for any courses that appear to have substantial overlap with program-required coursework. After reviewing the syllabus content, confirming a passing grade on the transcript, and interviewing the student, a tailored program will be collaboratively developed by the doctoral student, program director, and the student's advisor. Faculty do their best to determine the level of rigor and depth offered by the previous course(s); however, we also reserve the right to require the student to take a replacement or more advanced course if deficiencies are noted. In the event that deficiencies are noted later in the program, we may also ask the student take additional courses to bolster their deficient foundational knowledge.

All students must matriculate for two years of full-time study at Adelphi University before proceeding to internship.

RESIDENCY REQUIREMENT

The Doctoral Program in School Psychology at Adelphi University is designed as a full-time program of study. Students must meet the residency requirements as specified in the *Commission on Accreditation's Implementation Regulation C-5D: Academic Residency for Doctoral Programs*, indicating that students must: a) complete a minimum of 3 full-time academic years of graduate study (or its equivalent) plus internship prior to receiving the doctoral degree; b) at least 2 of the 3 academic training years (or the equivalent) must be completed at Adelphi University; and, c) at least 1 year must be in full-time residence at Adelphi University. Full-time status is defined as 9 graduate credits, although 12 or more graduate credit hours are required for full-time status for federal and state financial aid purposes and for tuition and fee rate calculations. To satisfy the minimum requirement of 1-year of full-time residency, students must enroll in full-time coursework for at least two consecutive semesters and summer session courses at Adelphi University.

ASSISTANTSHIPS AND OTHER FINANCIAL AID

Adelphi University makes financial assistance available based on academic merit and financial need. Many school psychology doctoral students receive graduate assistantships, although funding is not guaranteed. To improve the probability of being awarded a graduate assistantship, students should familiarize themselves with program faculty members, the courses they teach, and their research interests. The School Psychology Psy.D. Program offers four types of assistantships: 1) Research GA; 2) Assessment TA; 3) Departmental GA; and 4) Writing Assistance TA. Graduate assistantships range from 5-20 hours per week. Students have the option of tuition deferral, whereby tuition may be paid in installments for an additional fee, arranged with the Bursar's Office. Part-time employment is another option, with job opportunities available through the university's Center for Career and Professional Development (<https://www.adelphi.edu/career-center/>). General need-based financial aid includes Federal Stafford Loans (FSL) and Federal Work Study (FWS). These latter forms of assistance can be acquired by completing the Free Application for Federal Student Aid (FAFSA) or Renewal FAFSA on the Web at www.fafsa.ed.gov. Students interested in additional sources of financial aid, including federal and private loans, may contact Student Financial Services in Levermore Hall, (516) 877-3080. A comprehensive description of financial aid may also be found on their website: <http://ecampus.adelphi.edu/sfs/>.

CURRICULUM REQUIREMENTS

The doctoral program provides a graduated sequence of training in coursework, research, and clinical practice. The program follows a cohort model and, as such, students follow the course sequence set forth in the Handbook under which they were admitted when registering for courses (e.g., students entering in Fall 2021 should refer to the course sequence in the Fall 2021 handbook). Students may not deviate from the published course sequence without permission from their advisor (Appendix C; Change of Handbook Form). The course sequence included in this handbook is intended for students who enter the program in the year stated in this handbook.

The doctoral program is designed to be at least five academic years of full-time study, in addition to a one-year full-time internship (or its equivalent). Thus, it will typically require 5-years from the baccalaureate degree to complete all doctoral requirements. The program mandates a minimum of 110 semester hours of coursework, including 4 hours of dissertation research, and a 1750-hour internship that meets APA and NASP requirements.

MASTERS DEGREE

Students have the option to obtain an MA degree at the end of the third year of their studies. To obtain the MA degree they need to complete 36 credits which are part of the regular sequence and Required Courses and complete a pre-dissertation project.

The pre-dissertation project may involve either:

1. Publication in a peer review journal
2. Presentation at a peer review conference. A written report of the presentation should be submitted to the advisor as a paper in APA format, including a copy of the PowerPoint presentation or other appropriate format such as the presented poster.
3. An in-depth literature review in an APA format on a topic that would be approved and reviewed by a committee of at least two faculty members.

COURSE DESCRIPTIONS

All courses are 1:50 hours long and require an additional 10 hours of additional instruction time per semester. This can be arranged either through online discussion forums or through additional presentations by the instructor either in person or online.

0503-619 Human Development

This course is designed to familiarize students with theories of human development. We will cover leading theories and research on human development, spanning infancy, childhood, adolescence, and adulthood. Although there will be some breadth in the coverage, we will focus on relationships as a context for development and consider developmental factors as they impact adjustment. Coverage of relevant issues and topics will necessarily be selective rather than comprehensive.

0503-637 Social Bases of Behavior

The Social Bases of Behavior course is designed to facilitate students' knowledge and critical understanding of the major conceptual themes that form the basis for research and practice in the social and behavioral sciences. During this course, students will learn the theory, research, and practices related to the processes by which behavior is influenced by other people.

0503-723 Biological Bases of Behavior

This course is designed to provide doctoral students in psychology with an advanced understanding of selected topics pertaining to the relationship between the nervous system and human experience and behavior. Special emphasis will be placed on biological processes that relate to psychopathology and issues relevant to clinical practice.

0503-733 Cognition and Affect

This course will help students understand more about emotion and cognition and how it affects human behavior. We look at historical and philosophical perspectives briefly and will explore the interaction of emotion and cognition across non-social and social contexts, at the behavioral and physiological and neural levels.

0503-738 Individual & Cultural Differences & Identity

This course will provide students with an advanced understanding of models of diversity, individual and cultural difference, and how this influences clinical practice with diverse populations. The course will engage students in examining issues of difference, identity, world views, and experiences toward the goal of becoming culturally competent clinicians.

0504-600 Ethics in Psychology and School Psychology

Students will review ethical and legal issues and professional standards in psychology and school psychology practice. Obstacles to ethical and lawful actions will be analyzed and the importance of implementing ethical decision-making processes will be stressed. Ethics in research and the importance of maintaining confidentiality will be reviewed.

0504-601 Psychodynamic Perspectives in Working with Children

Students will learn psychodynamic concepts and how these apply when working with children and adolescents. Students will explore the usefulness of psychodynamic concepts when offering consultation services in schools and when conducting psychotherapy and play therapy sessions in residential or early intervention schools.

0504-605 Personality Assessment I

Students will learn to administer, score, and interpret personality assessment instruments. The instruments consist of direct assessment methods and projective techniques. Tests have been selected for study that are currently employed in schools and mental health facilities for children and adolescents.

0502-606 Research Design

Students will review experimental and quasi-experimental research designs in psychology, propose a researchable topic, and develop a research design for a significant contemporary issue in school psychology.

0504-607 Intellectual Assessment I

Students will review cognitive and achievement measures commonly used in school and clinic-based practice, and will administer, score, and interpret tests and write psychological reports. The course addresses theory and practice. Theories of intelligence will be reviewed, including *g* and CHC.

0504-608 Intellectual Assessment II

Students will continue to review cognitive measures commonly used in school-based practice, including current editions of the WISC, WIAT, and Stanford-Binet, and will learn to administer, score, and interpret these tests and write psychological reports. The course advances students' theoretical knowledge and practice.

0504-613 Implementing School-Based Prevention Programs

Students will explore strategies for preventing mental health problems in youth. Students will focus on the development and implementation of prevention measures to reduce various mental health related problems facing youth in schools, including delinquency, substance abuse, and learning failure.

0504-616 Consultation in School Settings

Students are introduced to school consultation. The overarching goals of this course are to prepare future school psychologists to help teachers and other school personnel effectively address the learning, behavioral, and adjustment needs of students and parents they serve.

0504-618 Practicum in School Psychology I

Students will focus on theory, research and practical considerations of working in public school setting, and review school policies and practices including RTI, formal and informal assessment, placement decisions, diversity policies and counseling techniques. This course satisfies the NYS mandate of Violence Prevention and Intervention.

0504-619 Internship in School Psychology I

Students will review best practice models of service delivery in school psychology, including RTI Tier I and II interventions, crisis intervention approaches, and assessment and intervention strategies. Students will also review ethical and professional issues in school psychology, along with best practices in addressing the needs of students in schools.

0504-620 Internship in School Psychology II

Students will continue to review service delivery models in school psychology, including RTI Tier I and II interventions. An emphasis will be placed on consultation practices and school-home collaboration initiatives and strategies, as well as to preparing students to apply for jobs in school psychology.

0504-621 Practicum in School Psychology II

Students will explore expanded theory, research and practical considerations of working in public school setting. Students will review school policies and practices including RTI, formal and informal assessment, placement decisions, diversity policies and counseling techniques. This course satisfies the NYS mandate of Violence Prevention and Intervention.

0504- 622 Statistics for School Psychologists

Students will be provided an introduction to inferential statistics used in psychology to manage, interpret, and analyze data. Students will be expected to conduct statistical analyses using SPSS and communicate the results of statistical analyses using APA format.

0504-625 Counseling and Assessment of the Multicultural Child

Students will review current practices in the assessment of linguistically diverse children and will learn the appropriate use of standardized measures, as well as when and how to conduct evaluations in the child's first or second language. Current practices in counseling students from linguistically diverse backgrounds will be presented.

0504-627 Psychotherapy with Children and Adolescents I

Students will learn the theoretical and clinical concepts to conduct psychotherapy with children in school and community settings. Students will be assigned to a child case in a school or community setting under the supervision of a faculty member.

0504-628 Psychotherapy with Children and Adolescents II

Students will learn key concepts for working with adolescents. Students will be assigned a case and receive supervision by a faculty member. Emphasis will be placed on understanding the challenges involved in working effectively with adolescents having a wide range of learning and emotional difficulties and establishing a therapeutic alliance.

0504-639 Dissertation Overview

This course is required for all students enrolled in the doctoral program in School Psychology to facilitate preparation of the dissertation and dissertation proposal. Activities are sequenced to introduce the "soup to nuts" of dissertation proposal requirements and processes, and provides support structures to facilitate completion of the main components.

0504-630 Psychoeducational Interventions II: Working toward Equity

Students will review the psychological and educational interventions used to address the needs of children with learning and emotional difficulties within a psycho-cultural context. Emphasis will be given on understanding the child's difficulties within a social framework that has an impact on issues of equity.

0504-631 Psychoeducational Interventions I: Learning and Emotions

Students will review psychological and educational practices to address the needs of children with learning and emotional difficulties in the classroom and home settings. Emphasis is placed on understanding the child's difficulties and conflicts, while proposing interventions that address the experience of the child and his/her family.

0504-633 Psychology of Groups and Peer Dynamics

Students will learn to analyze interactive processes and interpersonal dynamics basic to all group functioning. Theoretical issues in the fields of group dynamics among children and adolescents and the complexities of group intervention strategies will be reviewed. The importance and effectiveness of group interventions in schools will be explored.

0504-640 Dissertation Seminar I

Students will explore dissertation topics, APA style, research methodology, and submit a dissertation proposal. Current issues in the field of school psychology will be reviewed.

0504-641 Dissertation Seminar II

Students will present the progress on their dissertation proposal, review their conclusions/findings and explore or contemplate the implications of the topic they worked on to their experiences as school psychologists in the field.

0504-642 Dissertation Seminar III

Students will analyze, review, and interpret collected data to answer research questions or hypotheses. Students will explore the implications of how their findings relate to the practice of school psychology in the field.

0505-644 Roles and Functions of School Psychologists

This course examines the roles and functions of school psychologists, including the development of the specialty, delivery models, assessment, and interventions. In addition, the course addresses the provision of comprehensive and integrated school psychological services as outlined by the National Association of School Psychologists.

0504-645 Individual Differences and Special Education Exceptionalities

This course addresses the history, laws, policies, and practices in exceptional student education. Included are the history of special education, relevant laws and legal/ethical issues, as well as the characteristics, etiology, and special needs associated with a variety of exceptionalities in the schools. Also addressed are current practices and procedures for management. Students will also be presented with information as to how to assist and support families of exceptional children in order to work as a team to enhance learning. This introduction encompasses historical development, disability characteristics, diversity, legal issues.

0504-650 Case Seminar I (Externship)

Students will integrate theoretical knowledge gained in the classroom with clinical experiences gained within community, treatment, and mental health settings. The role of psychologists in these settings will be analyzed and treatment plans and intervention strategies that serve to address the needs of specific populations will be reviewed.

0504-651 Case Seminar II (Externship)

Students will continue to integrate theoretical knowledge gained in the classroom with clinical experiences gained at community, treatment and mental health settings. The role of psychologists in these settings will be analyzed and treatment plans and intervention strategies that serve the needs of specific populations will be reviewed.

0504-660 Child Psychopathology in Social Context

Students conceptualize child and adolescent psychopathology from several theoretical models, and review the role of diagnosis and assessment within the work of the school psychologists. Students will also learn how diagnostic processes contribute to disproportionality within certain diagnostic categories among marginalized groups.

0504-665 School Neuropsychology I

Students will develop a foundational knowledge of the main characteristics of the different types of learning disabilities and will learn to recognize possible indicators of learning disabilities from the cognitive and educational testing profiles. Curriculum-based measures will be reviewed.

0504-667 School Neuropsychology II

Students will expand their knowledge of the assessment of learning and developmental disabilities and will administer a school-based comprehensive neuropsychological battery to assess a child's cognitive, educational, and executive functioning skills. Students will propose remedial measures based on the assessment results.

0504-674 Tests and Measurement within a Social Justice Context

Students are introduced to advanced concepts in psychometric theory and practice and will review the properties of the tests used to evaluate students in school settings. The importance of culturally responsive assessment of diverse students and implementing informal assessment and RTI practices will be addressed.

0504-708 Counseling Techniques in School Psychology

Students will learn to conceptualize counseling cases within diverse theoretical models. Students will learn practical skills and competencies in school counseling. In school placements, students learn to plan and implement their work with clients, utilizing theory, research and self-reflection. Students will present of School Psychologists (NASP) and the health service provider specialty of professional psychology of the American Psychological Association (APA).

0504-710 Principles of Behavior

Students will learn theory and practice in the applications of behavioral principles to school psychology practice. Students will be introduced to evidence-based practices and will learn behavioral assessment and interventions both in class and through a supervised fieldwork placement.

0503-809 Cognitive Behavioral Techniques: Plurality and Integration

Students will focus on the various forms of cognitive behavioral treatments. Empirically-supported approaches, such as cognitive therapy for depression, group therapy for social phobia, interoceptive exposure for panic disorder, & exposure/response prevention for OCD will be introduced. Special attention will be paid to Acceptance & Commitment Therapy (ACT), Emotion Regulation Therapy, and other mindfulness-based approaches.

0503-835 History and Systems of Psychology

This course traces the historical roots of psychology in philosophy and physiology from the 17th century to modern times. Emphasis is given to development of experimental psychology in Germany, France, Great Britain, Russia, and the United States.

DOCTOR OF PSYCHOLOGY BENCHMARKS OF ASSESSMENT

Doctoral Comprehensive Examination

The comprehensive exam is a key component of advancing to doctoral candidacy. It is a means by which faculty ensure that students have the prerequisite knowledge and skills to become doctoral level school psychologists. The comprehensive exam, is a multiple-choice exam that covers foundational knowledge acquired by the students during their first two-years of graduate study. The exam will be administered at the end of the spring semester of students' second-year of study. Students are expected to pass this exam by December 1st of their third year of study. Students who fail the comprehensive exam should contact the Program Director to obtain specific and targeted feedback regarding why you received a failing grade. Students should consider strategies to remediate weaknesses prior to retaking the exam. Working collaboratively with the Program Director, schedule a date to re-take the comprehensive examination. Students have two opportunities to pass the comprehensive exam.

PRAXIS II Exam

In addition to the comprehensive exam, students must pass the PRAXIS II exam by the end of their fourth year in the program. The Program has adopted NASP's passing score of 155, which is required to be a Nationally Certified School Psychologist (NCSP). Praxis II examination scores shall be sent to Adelphi University and NASP at the time of testing. Students must pass the School Psychology Praxis prior to continuing to the fifth year of coursework. The Praxis II examination, administered by ETS as the comprehensive examination. More information about this test, as well as registration procedures, can be found at: <http://www.ets.org/praxis/nasp/requirements>.

Internship Portfolio

All students must complete an Internship Portfolio at the end of their internship experience. Program faculty use portfolios to evaluate the development of student knowledge, skills, competencies, and dispositions acquired and developed during training. At the end of the three years of graduate study, the completed Portfolio provides beginning school psychologists with a professional portfolio that communicates their individual professional beliefs and accomplishments. The portfolio allows graduates to showcase their accomplishments to prospective employers or postdoctoral supervisors. Finally, the faculty of the school psychology doctoral program will use portfolios to evaluate the efficacy of our training program. Faculty will summarize and analyze results of portfolio reviews annually and use these data to inform program improvements.

The Internship Portfolio required during the internship year must include: a) a professional statement; b) undergraduate and graduate transcripts; c) current curriculum vita; and d) submission of products that demonstrate completion and mastery of program goals, competencies, and professional behaviors. Students must submit: a) at least two assessment cases (e.g., intellectual, disability, social-emotional, academic, behavioral); b) an academic intervention (with effect size data); c) a behavioral intervention (with effect size data); d) a consultation case; e) a counseling case; f) individual and cultural diversity artifact(s); g) research assignment; and h) ethical, legal, and professional documents. Please see the School Psychology Field Placement Handbook for specific details regarding the requirements for this particular assignment.

Dissertation Proposal and Final Defense

All dissertation proposals must be directed by an Adelphi faculty member. Preparation and acceptance of the dissertation proposal should follow current Department guidelines, which include the submission of a written document outlining the intended scope of the dissertation. Approval must be initially obtained by the student's Dissertation Committee Chair prior to reviews by the student's committee. The student will then orally present and defend the proposal to their advisory committee.

The oral defense of the dissertation is considered the project capstone. Upon successful completion of all academic requirements, passing of the dissertation proposal defense, and completing the written dissertation, the dissertation defense is conducted. The content of the final examination is primarily related to the student's dissertation. All three committee members and an outside reader must participate in the final examination. An outside reader may or may not be a member of Adelphi. However, the decision regarding the student's performance rests solely with the advisory committee.

FIELDWORK AND CLINICAL TRAINING**Clinical/Community Externship**

Students are required to complete fieldwork and clinical training whereby applied experiences are integrated with school psychology doctoral course work and theoretical knowledge across multiple field training experiences. During the third year of doctoral study, students are required to complete a clinical/community externship. Externs shall extend their learning and practicing of professional skills in a clinical or community mental health setting (e.g., hospital, community mental health center, substance abuse recovery program, etc.). This field placement provides students with experiential learning with children, adolescents, families, or adults with myriad academic, behavioral, emotional, and other handicapping conditions. The clinical/community externship presents students with meaningful training opportunities for diverse activities, such as intakes, evaluations, counseling and psychotherapy, consultation, therapeutic group work, family therapy, and participation in interdisciplinary team activities. Externs are required to complete 500 hours of experience over the course of one academic year, including summer. Evening or weekend hours may also be available, subject to approval by the placement and the doctoral Program. A minimum of 1-hour of supervision weekly, by a licensed psychologist, is required. Please see the Field Placement Handbook for more details, policies, and forms. Students may not complete an internship at the site where they completed an externship.

Practicum

During the fourth year of doctoral study, students are required to complete a school-based practicum. Practicum experiences are provided in public schools or related agencies under the supervision of professional school psychologists employed by the school division or agency. Practicum settings are selected on the basis of their support of and willingness to comply with the program's training objectives. The practicum experience is specifically designed to prepare students for internship and ultimately, to work effectively with children, families, educators, and community mental health agents. Practicum activities are designed to systematically integrate theory, techniques, empirically-supported practices, research, ethics, and professional behaviors. As such, students are provided with increasingly complex experiences that prepare them to be effective school psychologists in diverse educational settings. Practicum is offered through a two-semester sequence. During the initial practicum semester, students will become acquainted with the educational community, participate in various roles of the school psychologist under direct observation and on-sight supervision, and participate in authentic professional development activities. As students develop skills, they will assume more professional responsibilities.

The second semester of practicum is designed to expand upon the experiences of the first semester. Students are required to participate in more activities and demonstrate greater independence, which will be necessary for internship. The practicum student will gradually be provided opportunities for more autonomy and responsibility in assessment, intervention, consultation, and professional development situations.

Practicum experiences are carefully supervised by the field-based supervisor and the practicum course instructor. Students are evaluated by both site and university supervisors. Students are required to maintain three credits of practicum each semester (6 credits total) during their third year in the doctoral program. A minimum of eight hours per week at the practicum site is required, totaling 280 hours over the course of the academic year. Additionally, students are expected to spend a proportionate amount of time, up to 10%, outside of the placement preparing for practicum activities, completing written assignments, and participating in professional development activities. Students will receive at least one hour per week of individual supervision from their field supervisor. Students also receive additional group or individual supervision from the university supervisor.

Practicum supervisors must be licensed psychologists who hold a valid state credential for the setting in which they are employed; possess a minimum of 3-years of full-time experience as a credentialed school psychologist or psychologist; be employed as a regular employee by the district or agency; and have education and/or experience in the supervision of school personnel.

Students must meet all standards and requirements necessary to complete the required practicum including, but not limited to, fingerprinting and/or criminal background checks or they would not be able to begin their practicum experience.

Please see the *School Psychology Field Placement Handbook* for a full description of the practicum experience.

Internship

- The Internship is the culminating clinical experience of the doctoral program of study. The internship site abides by the requirements set forth by APA and NASP, and is in concert with CDSPP (Council of Directors of School Psychology Programs) guidelines. Students cannot complete an internship at a site where they have previously completed fieldwork training. Students have the option to apply for an APPIC internship. Doctoral students who wish to learn about APPIC internships can find more information on the APPIC website. Internships occur on a full-time basis over a period of one academic year, or on a half-time basis over a period of two consecutive years, totaling a minimum of 1750 hours. As the internship reflects the final stage of training, prior to approval of the internship, doctoral students must have: a) successfully passed all required coursework, with no remaining Incomplete Grades; b) successfully completed all externship requirements; c) successfully completed all practical requirements; d) passed the *Praxis-School Psychology* examination; and e) passed the general comprehensive examination. Specific requirements for the internship, policies and procedures are detailed in the *Field Placement Handbook*. e) passed the general comprehensive examination. Specific requirements for the internship, policies and procedures are detailed in the *Field Placement Handbook*.

The internship must be supervised by a licensed, doctoral psychologist, with a minimum of 3-years of full-time experience working as a school psychologist or psychologist. Interns should receive at least two hours of individual supervision per week and two additional hours which may be in a group. The internship provides students with a comprehensive, supervised, carefully monitored and evaluated experience for students to continue to develop all program competencies and skills for independent practice. If the internship is to be completed in a non-school setting, the intern must have completed at least 875 hours of supervised experience in a school setting prior to the internship.

Internship credit is not given for past work experiences. Moreover, the intern must not be involved in employment that might potentially conflict with the goals, experiences, and requirements of the internship (i.e., completing the internship at their place of employment). All internship experiences shall be conducted in a manner consistent with the current legal-ethical standards of the profession. Students must log all internship activities and shall submit these logs to their University Site Supervisor. This comprehensive culminating field experience includes both formative and summative performance-based evaluations completed by site and university supervisors. Day-to-day supervision of the intern's activities rest directly with the appropriately credentialed school division/agency personnel.

Students are required to maintain three credits of internship each semester (6 credits total) during their internship year. A proportionate amount of time, up to 10%, can be used outside of the placement preparing for internship activities, completing written assignments, and participating in professional development activities.

Internship supervisors must be licensed psychologists who hold a valid state credential for the setting in which they are employed; possess a minimum of 3-years of full-time experience as a credentialed school psychologist or psychologist; be employed as a regular employee by the district or agency; and have education and/or experience in the supervision of school personnel.

Please see the *School Psychology Field Placement Handbook* for a full description of the practicum experience.

PROGRAM POLICIES AND PROCEDURES

The faculty of the School Psychology Doctoral Program at Adelphi University acknowledge the importance of both professional and personal growth to a student's success in the field. We hold students to high standards in the evaluation of their work to ensure competent practice in the field. We attempt to provide opportunities and activities to facilitate student growth and minimize stress. Orientation meetings are held each spring to better prepare students for the workload and expectations of the program. Each student, upon formal admission to the doctoral program in school psychology, is assigned an advisor, who is a core member of the program faculty. Students are expected to meet individually with their advisor to plan a course of study that meets their programmatic needs. In addition to advisement, close supervision and monitoring is provided to students during all practical and clinical courses, experiences, and placements.

Student Advising

Upon formal admission to the doctoral program in school psychology, each student is assigned an advisor who is member of the core program faculty. Program faculty advisors help students plan their program of graduate study, discuss the student's progress with regard to required coursework, research efforts (particularly the dissertation proposal and defense), as well as plan for productive experiences in their assistantships (teaching, research or clinical). Students shall keep advisors informed of their progress and accomplishments, and seek guidance about coursework, time management, assistantship work, research, and professional development.

Part-time Study

While part-time study is ordinarily not permitted in the doctoral program, under certain circumstances it may be necessary for a student to reduce her or his course load. Requests and justification for part-time study must be submitted in writing to the Director of the program.

Minimum Levels of Competency

To demonstrate minimal competency for professional practice, a letter grade in all courses of 'B' is required for doctoral students in the School Psychology Program. If a student earns a grade lower than a B in any course or key element assignment, the course instructor, the advisor, and the student will meet to develop an action plan, which may include requiring the student to re-take the course or to redo the assignment.

Student Feedback

The School Psychology Psy.D. Program faculty meet with their advisees at least annually to monitor their progress toward completion of program requirements and performance expectations. Students are provided written feedback regarding their annual performance; performance on the Internship portfolio if necessary; progress toward meeting program requirements; and additional written feedback if the student fails to meet academic standards, or evidences behavior that is incompatible with professional deportment. If such does occur, the student is notified in a timely fashion to discuss any problematic issues, suggestions to address these problems, and feedback about the extent that problems were successfully attenuated.

Time Limits

Students must complete all doctoral degree requirements within 7-years from the time of their first course registration in the Derner School of Psychology. If a student does not complete the program within the allotted time, they will be terminated from the program unless they have been granted a written extension by the Program Director, with a specific date for completing the program. Requests and justification for an extension must be submitted in writing to the Director of the Program. The Dean and/or Program Director may grant an extension for completion of the degree under the following conditions:

- The student shall have completed all requirements except the dissertation.
- The student must request an extension in writing, including written evidence of progress on the dissertation, setting forth a realistic timetable for its completion.
- The student may have to appear at an Evaluation Conference (EC), whose members are designated by the Program Director, appointed to consider whether to grant approval of the extension.
- The EC may choose to place additional requirements on the student as a condition for granting an extension.

Given these four conditions, an extension shall be granted at the recommendation of the student's advisor/dissertation chair, and the approval of the Program Director.

Leave of Absence Guidelines

Continuity of training and education is an important aspect of the program. Students are expected to enroll every semester throughout their program; however, a leave of absence (LOA) may be requested under certain circumstances. A request for a leave of absence should be submitted in writing to the Program Director and include appropriate supporting documentation (e.g., medical records). Medical leaves of absence may include physical illness or mental health issues. In the latter case, students shall provide written documentation of a diagnosis from a licensed clinician/therapist and contact the office of Academic Services. Without formal notification, the University will consider students on as 'administratively withdrawn' if not registered for courses for two consecutive semesters. In such cases, the student would need Program permission to be readmitted before they may register for courses. Extensions of an officially approved leave of absence require that the student petition this request with a written statement provided to the Program Director, School Psychology Doctoral Faculty, and the Dean of the Derner School of Psychology, providing a compelling reason for such an extension and provision for approved professional activities during the leave period. The decision will be based on the specifics of the case, including the student's previous performance in the program, and the professional use which will be made of the leave period. If leave is not granted, the student will be expected to return to full-time status; or will have to reapply and be considered as a new student. Students returning from an officially approved leave of absence within the specified period for the leave may continue their course of study at the point from which it was left. All coursework shall be considered up-to-date and the student may complete the program in effect when he/she entered the program. <https://operations.adelphi.edu/catalog/medical-leave-of-absence/>

Continuous Enrollment

Students must maintain continuous enrollment in the Psy.D. Program in School Psychology to retain active status during their doctoral course of study. All students must register each fall and spring semester to uphold their continuous status in the program. If students do not register, the student will be discontinued from the program. Students who register for courses but then leave without notifying the Program Director will continue to incur tuition and other charges. All students in the university must maintain continuous registration (register for at least one credit hour in both Fall and Spring semesters prior to graduation) to retain their status in a degree program.

Transfer Credit

Students in the five-year track who wish to request degree credit for graduate work taken at another institution of higher education, should consult with their program advisor. A maximum of 6 hours of credit earned from other accredited institutions of higher education may be applied toward the doctoral degree. Prior coursework may be considered for transfer credit under the following conditions: 1) the course was taught at the *graduate* level and *restricted to graduate students only* at a regionally accredited college or university; 2) the course was completed within five-years of the date of admission to the student's current graduate program; 3) the student must have received a grade of B or better. It is the student's obligation to provide a university bulletin containing the course description and the syllabus for the course(s) for which transfer of credit is under consideration. Transfer credits must be approved by the Program Director. At least 2 of the 3 academic training years (or the equivalent thereof) must be at Adelphi University, and at least 1 of these years must be in full-time residence (or the equivalent thereof). Transfer credit forms are available in the Dean's Administrative Offices, HWC #302 (Appendix E).

Course Waivers

The program's policy is that students should not be required to engage in needless repetitious coursework when they have satisfactorily acquired the knowledge and skills embodied in a particular requirement, and that graduates of any program in psychology are regarded and evaluated by the professional community on the basis of completion of their *most advanced* program. Therefore, it is the Program's responsibility to ensure adequate development of the knowledge and skills required of all professional school psychologists.

Students who believe they have previously met the objectives of a graduate course offered by the Derner School of Psychology may request a program course waiver. Requests for a course waiver should be directed to the student's advisor, who will consult with the Psy.D. Program Faculty in School Psychology that teach the course (Appendix F). Please note that not all requests will be approved. Semester hours of credit are not awarded for exempted courses, and the total number of required hours in a degree program will not be reduced. ***Requests for program course waivers must be made within the first semester following admission, to the Program Director.*** Should approval not be granted, ***Requests and justification for course waivers must be submitted in writing to the Dean.***

A specific course may be waived by the Program Faculty under the following conditions: a) the previous course for which the student desires credit was a course taught at the *graduate* level and *restricted to graduate students only* at a regionally accredited college or university; b) the student earned a grade of B or better in the course; c) satisfactory review and approval by an instructor of the course to be waived for comparability of content; and d) the course was taken within five years of the student's matriculation to the program. Faculty may request additional information and/or request that the student pass an exam and/or demonstration, indicating competency prior to awarding a course waiver. Approval for course waivers will be granted by the Director of the program after consultation with the faculty and the student's advisor. A copy of the approved course waiver form will be provided to the student and put in their official university file.

Program and Departmental Service

It is expected that all students in the doctoral program will actively participate in program and department service obligations. Typically, the Psy.D. Program in School Psychology nominates students to serve on program committees (e.g., Admissions Committee), representatives for Open Houses, and as student representatives for formal Faculty Searches. In addition, the program faculty members often nominate students to serve on program, department, or university committees to allow graduate students the opportunity to provide input on important matters related to program, department, or university governance.

Professional Organization Involvement

Involvement in professional organizations is an integral component of inculcating students to the profession of school psychology. Students are strongly encouraged to become members of national organizations such as the American Psychological Association (APA) Division 16 (School Psychology), National Association of School Psychologists (NASP), American Educational Research Association (AERA), Society for Research on Child Development (SRCD), and Council for Exceptional Children (CEC). Students may also become professionally active in state and local organizations, such as the New York Association of School Psychologists (NYASP) and New York State Psychological Association (NYSPA). Membership in professional organizations facilitates growth as a psychologist through information dissemination, professional identity and networking, and continuing education.

Professional Liability Insurance

Liability insurance provides students-in-training with financial protection from lawsuits related to their training experiences. Adelphi University provides insurance for all students in field placements. As students of Adelphi, there is general liability and malpractice coverage available. More information about the amount of coverage can be obtained by contacting the Risk Management office at Adelphi University. As of May 2019, the general liability insurance coverage was \$1 million/\$2 million (per incident, per aggregate), while the malpractice insurance coverage was \$2 million/\$4 million (per incident, per aggregate). Students have the option to apply for additional liability insurance (e.g., American Psychological Association Insurance Trust, <https://www.trustinsurance.com>).

Professionalism

Professionalism is considered a core competency of psychology and includes honesty, integrity, accountability, responsibility, and respect for others. Students are expected to follow these competencies throughout their graduate training, and act with courtesy and respect toward others. Students' professional behavior is expected to conform to the ethical principles of psychologists and codes of conduct outlined by the American Psychological Association and the National Association of School Psychologists.

Travel Approval/Travel Expense Procedure

Students are eligible for reimbursement for travel related expenses for up to up to a \$ 500. To be eligible for reimbursement, students need to present their own papers or be the lead presenters of a paper or poster. **To be reimbursed for travel related expenses students need to fill out the forms listed below and to follow the following steps:**

- Fill out the form completely at least 30 days **BEFORE** any travel arrangements are made/conference date.
- Attach **DRAFT** itineraries of your hotel and flight.
- Attach a complete registration form.
- **Attach documents showing information for the conference such as:** a brochure (*online printout from the conference website*) and what the conference is about, date and location, and if you're invited, attach the letter/email.
- Return the form to Kathy Bishop located at Hy Weinberg, room 317, for processing.

Travel approval forms must be signed by the Dean in order to be reimbursed for any trip. Students will be reimbursed up to the total of **\$500** for the year.

Once you return from your trip, you will need to complete a **Travel Expense Form**.

- Fill out the form completely.
- Attach all **ORIGINAL RECEIPTS** to the form for reimbursement (without original receipts you will not get reimbursed for that item).
- Expenses **MUST** be submitted with **60 days** after expense was paid or incurred.

The Travel Expense Form is located in the Deans' administrative office, in room 302. If you have any questions, contact Kathy Bishop at 516-877-4840 or via email at kbishop@adelphi.edu.

Scheduling Proposal and Defense Meetings

Students will discuss scheduling their proposal and dissertation defense with their dissertation chair and their committee members prior to scheduling their defense. The School Psychology Program recommends that students submit the final document for all research requirements (i.e., proposal and final document) a minimum of three weeks prior to the intended defense date (i.e., proposal, defense) to be scheduled.

Student Mail Folders

Doctoral students have their own mailboxes, located in Room 107 of Hy Weinberg. Students are encouraged to check their mail on a regular basis.

Colloquia

The Derner School of Psychology and Psy.D. Program in School Psychology, host presentations and lectures by distinguished psychologists at various colloquium series. These colloquia provide an excellent opportunity for learning regardless of the area of expertise of the distinguished speaker. Times, dates, and places for colloquia are announced well in advance via email and postings in and around Hy Weinberg.

Collaborative Institutional Training Initiative (CITI: Social and Behavioral Sciences course)

The CITI course is required by Adelphi University for all individuals involved in human subjects and is required for all students as part of the training program. Students are required to complete the Social

and Behavioral Sciences course during the 0502-606 *Research Design* class. The minimum level of achievement for the CITI course is a passing score set by the CITI program.

Dignity for All Students Act (DASA) Training

To qualify for provisional certification as a school psychologist in New York State, students must complete Dignity for All Students Act (DASA) training either by attending Adelphi's School of Education course 0801-697 or by providing proof of attendance at a New York State approved site. Adelphi offers DASA workshops for a fee of \$50. For upcoming workshops, please see Adelphi's website (<https://search.adelphi.edu/course-search/>). For other DASA approved workshop providers, please view the following website (<http://www.highered.nysed.gov/tcert/certificate/dasa-applicant.html>).

Student Records

All student files are digitalized and are maintained electronically on a secure network with access limited to the DCT, DFP, and the administrative staff supporting the PsyD program. Access to a specific student file is permitted upon request to the relevant student and advisor. Student educational records (including academic work and course grades) are protected in multiple ways by the IT Department of Adelphi University compliant with FERPA regulations. Students can also access their educational records through the student services system CLASS.

Graduation Guidelines

Students are responsible for ensuring that all program requirements (other than completing internship) have been satisfied. If all requirements have been completed, students who are on internship should be able to participate in the May commencement ceremony even though their degree will not officially be conferred until August. Doctoral students must complete their dissertation by the stated guidelines to participate in the doctoral commencement ceremony.

To graduate in May, students must complete their dissertation defense, including final revisions, by May 15th. (May graduates must complete their internship by June 30th). Dissertations must be defended by May 1st.

Remember, in order to walk for a May graduation, the date for the oral defense must be posted by May 1st (and scheduled by the doctoral hooding date). Internship can still be completed after June 30th.

ACADEMIC POLICIES

Students in the Doctoral Program in School Psychology are subject to the academic policies, rules, and regulations of (a) the Psy.D. Program in School Psychology, (b) the Derner School of Psychology, and (c) Adelphi University. The academic policies for the School Psychology Doctoral Program are as follows:

Student Evaluation Procedures

The School Psychology Doctoral Program faculty continually measure satisfactory student progress, as well as programmatic efficacy, using multiple methods and multiple data sources, across multiple contexts. Students are evaluated annually and their evaluation is based on a) course grades, b) feedback from externship, practica and internship supervisors, c) feedback from faculty members and d) progress in achieving programmatic milestones.

Demonstration of student professional dispositions are evaluated across settings and include university and site supervisor evaluations (once at the end of the Fall semester; once at the end of the Spring semester), and annually with the student's advisor; interactions with peers and university and school personnel; and through the evolution of the role of school psychologist during internship.

Academic requirements

All students must maintain a minimum cumulative GPA of 3.0 (3.0 on a 4.0-point scale) in all academic work and fulfill all course related requirements at a satisfactory level (***minimum levels of competency***). Further, all students must pass Intellectual Assessment I and II with a minimum grade of 85 (B) in order to continue to the next semester in the program.

Research Components

Students will be provided with opportunities to become involved in research experiences from the beginning of their program. In addition to specific course work, student research activities include research assistantships, course work research projects, doctoral dissertation, and student-initiated research activities. Initially, students are assigned to work with faculty members on various research projects. These activities often lead to conference presentations and publications.

PROGRAM REMEDIATION, RETENTION, AND DISMISSAL POLICIES AND PROCEDURES

Throughout the student's program of study, faculty will review and address concerns about the student's (a) competency in coursework and clinical work or (b) professional or ethical conduct (i.e., skills and dispositions). By virtue of their professional preparation, supervisory roles, and professional ethics, faculty members document and address concerns about a student's academic performance, personal dispositions, or professional functioning. The following are examples of circumstances or performances that may form the basis for a remediation plan or program dismissal:

1. **Failure to maintain minimum academic standards:** According to the Doctoral Program in School Psychology Program policy, graduate students must maintain a minimum GPA of 3.0 (minimum levels of competency), inclusive of all graduate courses taken since enrollment in the program.
2. **Unsatisfactory performance in externship, practicum, internship, or other practice-related courses:** Grades of B or higher, or "pass" are required in all clinical placements and practice-related courses.
3. **Unethical practices, unprofessional conduct, or behaviors that interfere with the training process or threaten the welfare of people with whom students have professional contact (e.g., clients, supervisees, students, research participants, peers):** Students are expected to subscribe to the professional and ethical standards of the American Psychological Association and the National Association of School Psychologists. Ethical breaches and unprofessional conduct, including behaviors that occur off campus – especially behaviors that impede the training process or threaten client welfare – may constitute grounds for a remediation plan or program dismissal.
4. **Failure to comply with University, department, or program policies on academic integrity (e.g., plagiarism, cheating, fabrication, and participation in academically dishonest activities).** Students are expected to abide by Adelphi University Code of Conduct (<https://operations.adelphi.edu/catalog/conduct/>), as well as the School Psychology Doctoral Program policies on related issues.
 - a. **Plagiarism.** This is defined as the intentional or unintentional presentation of the words or ideas of another, as one's own, without due recognition/citation of the other's work.
 - b. **Cheating.** This is defined as the intentional or unintentional use or attempted use of unauthorized materials, information, or study aids in any academic exercise.
 - c. **Fabrication.** This is defined as the intentional or unintentional and unauthorized falsification, misrepresentation, or invention of any information, data, or citation in an academic exercise.
 - d. **Participation in academically dishonest activities.** This is defined as the intentional or deliberate engagement in deceitful behaviors. Examples may include: a) Obtaining an exam from another student; b) Purchasing a prewritten paper through a mail-order or other service, including via the Internet; c) Sharing a take-home exam, case-study, or other assignment with a classmate without the explicit permission of the instructor; and d) Alteration, theft, forgery, or destruction of the academic work of other students, library materials, laboratory materials, or academic records including documents, transcripts, and examination/ course grades; and e) Deliberately missing an exam or assignment deadline to gain an unfair advantage.

Violations of the code of academic honesty will be handled according to University policies and procedures, as well as the policies and procedures of the Derner School as outlined below. The complete Adelphi University academic honesty policies and procedures can be found at: <http://academics.adelphi.edu/policies/honesty.php>.

Unprofessional behavior is defined broadly as any inappropriate conduct with regard to clinical practice and research. To define such misconduct, the program adopts the APA Ethics Code (<http://www.apa.org/ethics/code/index.aspx>), as well as the NYS definition of unprofessional conduct for psychologists under Article 131, Section 6530.

Retention Standards

The Psy.D. School Psychology training program at Adelphi University adheres to the following standards of student performance. Students must meet these standards to insure satisfactory academic standing within the program.

1. A student must maintain a minimum of a "B" average (3.0 on a 4-point scale) in all academic courses completed in order to be awarded a degree.
2. A student who earns a grade of "C+" or lower in any course will be required to repeat the course, as this grade falls below the minimum levels of competency, and is considered a failing grade.
3. A student who earns a "B-" or lower or an "I" in any diagnostic course (e.g., assessment), will not be permitted to enter Externship or Practicum (until the course is retaken and the grade improved/changed to at least a "B (85)," which is the minimum level of competency).
4. A student receiving more than one "D" or "F" in required courses of the doctoral school psychology program will not be permitted to continue in the program.
5. A student who earns an "F" in one or more semesters of Externship or Practicum course or receives an unsatisfactory evaluation by their field supervisor, will not receive a recommendation for Internship. The student may petition to retake externship or practicum and their status in the program will be reviewed after completing the retake externship or practicum.
6. A student who earns an "F" in one or more semesters of Internship or receives an unsatisfactory evaluation may be dismissed from the program. The student can petition to retake Internship and their status in the program will be reviewed after completing the retake internship.

Requests and justification regarding retaking a course or dismissal from the program, must be submitted in writing to the Director of the Program. The Director of the Program will present the petition to the Psy.D. School Psychology Program faculty. The student will be given the opportunity to address the school psychology doctoral faculty in person if desired. The program extern/practicum/intern supervisor will respond in writing to the student's written request (after consulting with School Psychology Doctoral Program faculty). ***The petition needs to be approved before the student can register to retake the course.***

Remediation Procedures

If a problem is identified, the following procedures will be implemented with all steps being documented in writing in the Doctoral School Psychology Improvement Plan, as well as communicated to the student during a formal conference with his/her advisor and/or other appropriate program faculty.

1. The student will be notified in writing of the specific problem areas noted by the program faculty (See Appendix H for notification form).
2. Unless the problems are severe enough to warrant an immediate dismissal, a School Psychology Improvement Plan (Appendix I) to remediate the problem will be developed by the student, the student's advisor, and relevant program faculty. This plan will identify the specific area(s) of concern, operationally define the student's problem(s), specify the expected objectives for performance improvement, specify a remedial plan to reach those objectives, and designate a timeline for goal attainment or re-evaluation. During this remedial period, the student is on academic probation. Students who choose to not accept the remedial plan will be automatically dismissed from the program.
3. At the time of re-evaluation, a Follow-up of Improvement Plan form (See Appendix J) will be completed. Four options exist for the program faculty:
 - Decide that the specific problem has been appropriately remediated and the student is allowed to continue in the program.
 - Continue probation and remediation with an updated improvement plan and a new date set for re-evaluation.
 - Counsel the student out of the program.
 - Formally dismiss the student from the program.

A final re-evaluation meeting will be held between the School Psychology PsyD faculty members and the student. During this meeting the faculty decision will be presented to the student in writing. If the faculty decision is student dismissal, the student will have the option to appeal the decision to the Dean of the Derner School of Psychology.

Remediation considerations

Several possible courses of action designed to remediate impairments include, but are not limited to:

- Increasing supervision
- Increasing field-work experience
- Broadening field-work experience
- Changing the format, emphasis, and/or focus of supervision
- Recommending personal therapy
- Reducing the student's workload
- Requiring additional coursework or experiences
- Recommending a leave of absence

Dismissal Procedures

The decision for dismissal is based on the faculty's conclusion that the student has not demonstrated an adequate level of competency as defined by the retention standards. Should the final decision be to terminate the student from the program, the student shall be informed in writing by the program director. Students may petition the adverse decision with the Dean. Student petitions should include a rationale for their lack of progress, justification for continuing in the program, and an action plan that includes a timeline for returning to good standing in the program. If the procedure in the last step fails to resolve the conflict, the Dean will inform the student about the student's right to appeal to the higher University administration and gives the student a written report of the results of the procedures used to resolve the conflict. The Dean/Associate Dean will advise the student about the University grievance procedure and is available to the student for help and direction in following this procedure (<http://academics.adelphi.edu/policies/complaints.php>).

Student Rights

1. Students with a previously diagnosed disability have the right to request reasonable accommodations ensuring equal access to courses, course content, programs, services, and facilities.
2. Students have the right to expect prompt responses to requests pertaining to academic matters.
3. Students have the right to a learning environment free from harassment, discrimination, and violence.
4. Students have the right to due process in disciplinary procedures in accordance with the rules and procedures prescribed in the Student Code of Conduct.
5. Students have a right to a hearing regarding any accused misconduct.
6. Students have the right to access established procedures for respectfully presenting and addressing concerns or complaints to the University.

Student Responsibilities

1. A student has the responsibility to respect the rights and property of others, including other students, the faculty and University officials.
2. A student has the responsibility to recognize that student actions reflect upon the individuals involved and upon the entire University, the Program, and the field of School Psychology.
3. A student has the responsibility to maintain a level of behavior that is consistent in supporting the learning environment of the institution and recognize the University and Program's obligation to provide a safe environment for learning.
4. A student has the responsibility of assuming the consequences of their own actions.

GRIEVANCE POLICIES AND PROCEDURES

On occasion there may be complaints and grievances between faculty and students during the student's matriculation through their program of study. When students raise an issue and believe it has not been resolved to their satisfaction or they continue to experience conflict and need assistance, students have the right to file a grievance. Students shall follow the policy and procedure for grievance procedures set forth by the Graduate Bulletin below:

Course Grades

Student grades are submitted by the instructor of the course. Any request for a change of grade must be submitted to the instructor; changes to grades must also be approved by that instructor. A grade may be changed only if there is unequivocal evidence that it was the result of computational or mechanical error. Students who believe their grades are incorrect or unfair should:

- Discuss their coursework and resulting grade with the instructor.
- Review with the course instructor the grading policies for the course.
- Appeal to the instructor for a change of grade.
- Unresolved grade appeals should be brought to the student Advisor's attention and to the Director of the program.
- The Program Director may choose to try to resolve the issues by discussing the matter with the instructor.
- If the student remains dissatisfied, students should bring their concerns to the assistant or associate dean of the school responsible for the course.
- The appropriate dean may choose to try to resolve the issues by discussing the matter with the Director of the program, the student's advisor and the instructor.
- If the issues remain unresolved to the student's satisfaction, the student may request that the Office of Academic Services discuss the matter with the instructor.

- If all previous avenues of appeal fail to resolve the matter, the Associate Provost may choose to discuss the matter with the appropriate dean.

Adelphi University maintains an Ombuds Office that is responsible for fully and fairly addressing complaints concerning conduct by faculty acting as part of their affiliation with the University (<https://operations.adelphi.edu/catalog/protocol-for-student-complaints/>).

If the Director, Dean, or Provost concludes that a grade was a result of arbitrary or capricious conduct on the part of the instructor, the student may be allowed to withdraw from the course. In the case of arbitrary or capricious conduct, the department or school may allow the student to take a substitute course to replace the course in question.

All disputes concerning the accuracy of a grade must be raised within one calendar year. Grade changes must first be signed by the instructor and then by the program director and the appropriate dean before being submitted to the Registrar.

APPEALS PROCESS

All doctoral school psychology students have the right to appeal actions of **probation** or **dismissal**. All appeals by doctoral students are referred to the Dean. The purpose of an appeal is not to re-hear the case, but to address the decision that was made. Grounds for appeal include: a) Fairness of the process; b) Introduction of new evidence; and, c) Harshness of the action.

Procedures for Appeals:

1. The doctoral student must submit a written request to the Dean, providing the rationale for the requested appeal.
2. The Dean assembles an Appeal Committee that will include the Dean, the Program Director and a faculty member who was not part of the Evaluation Conference to hear the appeal.
3. The school psychology doctoral student may submit a written report to the Appeal Committee prior to the hearing.
4. The doctoral student makes an oral presentation in person to the Appeal Committee.
5. A question and answer period by the committee with the doctoral student follows.
6. The Dean is the presiding officer for the Appeal Committee.
7. The Appeal Committee deliberates following the hearing and makes its decision.
8. There is no provision for attorneys to be present during the proceedings of an appeals hearing (except if there are criminal charges pending regarding the concern).
9. If the issue remains is not satisfactory to the student, the student may appeal to the Provost of Adelphi University. Students may also request that the Office of Academic Services become involved to help resolve the matter.

UNIVERSITY POLICY ON HARASSMENT, DISCRIMINATION, AND RETALIATION

The University's policy against discrimination and harassment is articulated in their policy statement (<https://hr.adelphi.edu/policies/anti-discrimination-harassment-and-retaliation-policy/>). Below is an abbreviated version of the document with procedures and contact information for individuals who believe they are experiencing any of the aforementioned issues.

Adelphi University is committed to extending equal opportunity in employment, admission, educational policy and programs, student financial assistance, all University administered activities and programs to all qualified individuals without regard to race, color, religion, sex, sexual orientation, age, national/ethnic origin, physical disability, or status as a disabled or Vietnam-era veteran.

In addition to meeting fully its obligations of non-discrimination under federal and state laws, Adelphi University is committed to maintaining a community in which a diverse population can live and work in an atmosphere of tolerance, acceptance, civility and mutual respect for the rights and sensibilities of each individual, regardless of differences in economic status, ethnic background, political views or other personal characteristics and beliefs. In support of this commitment, it is the moral responsibility and the pledge of the University to protect all those under its care from any form of discrimination or harassment.

Acts of harassment, threats, vandalism and violence are in themselves serious and morally objectionable, but when combined with overtones of discrimination and prejudice, they become even more offensive and reprehensible. Such acts as telephone or written harassment, physical violence, as well as the use of graffiti and other damage to property are considered crimes by the New York State Penal Code and thereby punishable by prison and/or fines.

Students encountering any form of discrimination or harassment should report these matters immediately to the Dean of Student Affairs. This office is prepared to address all inquiries as well as allegations of discrimination and harassment and will assist students to take appropriate follow-up action. For more information on the University's policy on sexual assault, go to <http://students.adelphi.edu/sa/dean/assault.php>

DOCTORAL DISSERTATION

The Psy.D. program is designed to educate psychologists as users of research. The goal of the program is to train psychologists who can deliver evidence-based psychological services and seek and review research to guide their professional practice. The preamble to the 1989 New York State Doctoral Project indicates that a Psy.D. Program, "includes training in research, but the research emphasis is on the evaluation of professional techniques and service outcomes and other applied activities." The doctoral dissertation in a Psy.D. program should reflect these goals. There are a wide variety of acceptable standards for dissertations, including empirical research, single subject design, clinical case studies, and program evaluations. All dissertations must include an abstract, a statement of the problem, a literature review, research questions and hypotheses, method section, discussion section, limitations, and practice and professional implications. The dissertation proposal and the dissertation shall be written in concert with the 7th Edition of the American Psychological Association's Publication Manual.

TYPES OF DISSERTATIONS FOR THE Psy.D. DEGREE IN SCHOOL PSYCHOLOGY

Students have several options in selecting the type of dissertation that they would like to pursue, as doctoral dissertations take several forms. The dissertation proposal and final thesis must include a: Title Page; Abstract; Introduction; Review of Literature; Statement of the Problem; Research Questions and/or Hypotheses; Methods; Discussion section that includes limitations and suggestions for future research; References (Limited to those cited in the proposal); and Appendices (if necessary).

1.) Empirical Studies: Involve the collection, analysis, and interpretation of original data (broadly defined to include secondary analysis of archival data already available) to address a problem of theoretical or practical interest.

a.) Quantitative (includes single-subject design research): The quantitative dissertation is an empirical study of a topic relevant to the professional practice of psychology utilizing quantitative research techniques. It seeks to make a scholarly contribution to the field using either original data collected during the course of the dissertation or archival data from a preexisting data set (i.e., secondary analysis of data). With these types of studies, students develop specific research questions and hypotheses, often derived from theory, and conduct empirical testing of predictions derived from these hypotheses. Examples of methodologies for these types of studies include but are not limited to, group experiments, single case research, quasi-experimental, ex post facto or causal comparative, and correlational. Other examples of quantitative research studies include meta-analyses, program evaluation, and needs assessment, described in greater detail below as separate categories. The *sine qua non* for the quantitative dissertation is the analysis of numerical data. The majority of material pertinent to this type of dissertation is covered in a "research methods" class for conducting quantitative research.

b.) Qualitative: A qualitative dissertation is an empirical study that uses interviewing and other forms of systematic, open-ended inquiry to collect detailed descriptions of participants' first-hand experiences in a specific situation of interest; these in-depth descriptions are analyzed through interpretive methods designed to bring forth thematic meanings embedded in participants' subjective experiences and how their behavior is influenced by those meanings. Qualitative methods include, but are far from limited to, interview studies, focus group studies, and phenomenological studies.

c.) Mixed Methods: A research investigation containing both quantitative and qualitative elements. A mixed method study creates a rich form of understanding about the phenomenon under study through integrating knowledge yielded by both investigative modes.

2.) Meta-analysis: Meta-analysis, as its name implies, involves data analysis at a more general level than standard descriptive or inferential statistics. It uses findings across studies, as opposed to responses drawn from individuals, as the data to be analyzed. After following the procedures of traditional narrative review with respect to selection of topic and relevant literature, the meta-analyst transforms the findings from each study (*t*-tests, correlations, *F* ratios, etc.) into measures of effect size. The next step is to examine the variance of effects across studies to determine whether the differences observed between studies are greater than that which would be expected from simple sampling variance. If there is evidence of additional variance (note that in fact this is rather uncommon), other carefully suggested, theoretically relevant moderating variables may be examined, such as sample characteristics, measures employed, etc. These moderating variables should, for the most part, be chosen and defended prior to the performing of the analysis, lest choosing a grocery basketful of *post hoc* hypotheses produce significant findings simply by capitalizing on chance. On the other hand, the influence of some study characteristics on findings may only be manifest after the data has been gathered (e.g., Donahue, 1985). To perform a meta-analysis, the student needs to learn the analytical procedures unique to it, such as transforming a variety of inferential statistics into a common effect size measure, and some of the basic issues surrounding the technique as a

whole. Of great benefit, sophisticated software has been developed to simplify the effort involved in calculations, so that the student may focus more attention on interpretation.

3.) Critical Review of the Literature: In a critical literature review, one chooses an area of research, reads the relevant studies, and devises a meaningful way to organize, integrate, and evaluate the published material, noting gaps in the literature (e.g., research questions not yet addressed) or trends in findings not yet noted by others. One example of an organizing theme is a conflict or controversy in an area, for example the validity of a particular assessment instrument or the effectiveness of a therapeutic procedure. Publications presenting all sides of the controversy are discussed, concluding with a critical analysis and recommendations. The latter should include novel insights into the state of the literature, and suggestions for further progress in the question. Another approach is to trace the development of a particular concept over time, concluding with a critical analysis of the present state of the question, any issues as yet unaddressed, and suggestions for further analyses. Thus, a literature review has two fundamental purposes: 1) to describe work done on a specific area of research, and 2) to critically evaluate this work. Both the descriptive and evaluative elements are important parts of the review; such a review does not simply describe past work without evaluating it. Moreover, if one or more theories have been developed in the area being focused on (i.e., the literature review is “theory driven”), one does not just discuss the given theory/theories without both describing and evaluating the work done to test it/them and discussing the theory’s/theories’ advantages and inadequacies. Through immersion in the most recent literature, it is expected that the student will have become uniquely familiar with research in the area, providing a perspective that can advance the state of the research.

4.) Theoretical Studies: Theoretical studies involve closely and carefully reasoned efforts to synthesize existing theory and research in a specific area pertaining to professional psychology in order to propose a new and original way of explaining, organizing, or understanding the area of interest. Theoretical studies should include an extensive, critical review of the existing literature, a proposed model for understanding the literature, and a discussion of applied and research implications. A different type of theoretical study may entail a systematic, empirically-based evaluation of alternative theories in the student’s focal area of interest.

5.) Program Evaluation: Program evaluation consists of an empirical study explicitly intended to support the design, delivery, or impact of a human service program. A program evaluation study may include questions pertaining to program utilization, implementation, fine-tuning, and effectiveness. The use of traditional empirical, as well as action research methods, is supported.

6.) Needs Assessment: A needs assessment is a type of dissertation related to program evaluation that can be carried out either in conjunction with the latter or as a separate project unto itself. Needs assessment entails the use of a systematic process for determining and addressing the specific needs of an organization, important stakeholders within that organization, and/or a specific, well-defined population. A needs assessment tends to be an integral part of a planning process that can subsequently lead to some type of improvement in a system, organization, and/or service delivery.

7.) Design of an Innovative Program: This type of project consists of an in-depth design of a program of psychological strategy, methodology or techniques to achieve some goal consistent with contemporary principles of professional psychology. The program developed must demonstrate application of relevant theory, research, and consideration of similar programs reported in the literature in its design, and must include a detailed plan or guideline for the evaluation of the program developed, even though the evaluation will not be conducted as part of the dissertation. Suggested procedures or at least some discussion of issues and possible procedures for maintenance of the proposed program in terms of available resources once the program organizers have departed from the scene must be built into the program proposal.

8.) Case Study (includes single subject design): A case study involves a comprehensive, systematic, rigorous, qualitative analysis of one or more clinical case studies involving a particular type of presenting problem and theoretical approach of clinical interest to the student. These studies involve standardized, quantitative measures of outcome, and sometimes standardized, quantitative measures of process.

9.) The Relationship Between Psychology and Public Policy. There are many areas of public policy where psychology might have an impact, either by direct service or through consultation based on existing psychological knowledge and practice (e.g., nuclear arms; environmental policy, policies affecting children, mentally ill, elderly, etc.). Dissertations of this type involve a thorough analysis of the history and rationale for a current policy; a rigorous and critical integration of relevant psychological knowledge; and specific recommendations for policy modification, research, and/or service that might be provided by professional psychologists.

Doctoral Dissertation Proposal

Doctoral Dissertation Committee

All students are required to complete a doctoral dissertation under the supervision of their dissertation chair. Students should select a dissertation chair of the proposed dissertation research. The dissertation proposal committee consists of the dissertation chair and at least one faculty member whose expertise matches the student's project. At least one of the two committee members must be faculty from the Derner School of Psychology. It is recommended that the dissertation proposal is limited to 50-pages, inclusive of references.

Proposal Evaluation

After the Chair has approved the proposal for distribution, copies will be given to the other faculty members (The degree of involvement of the committee prior to this point is at the discretion of the members). The members can either approve the proposal as ready to be discussed at the proposal meeting or require revisions prior to scheduling a meeting. When all committee members view the proposal as acceptable for discussion, the proposal meeting may be scheduled. All committee members must receive a copy of the proposal with revisions at least two weeks prior to the scheduled meeting date.

An announcement of the proposal meeting, including a list of permanent and special committee members, will be posted publicly and copies sent to the Program Director and the Dean/Associate Dean of the Derner School of Psychology. Following the proposal meeting, the Proposal Defense Evaluation Form (see Appendix M) must be signed by each committee member and sent to the School Psychology PsyD. Program Director (DCT) and the Dean/Associate Dean for approval.

Once the proposal has been approved by the Committee, the candidate is then responsible for carrying out the project, addressing the research questions outlined in the study and following the specified method. Minor changes in the research questions or methods may be approved by the Dissertation Committee Chair. Changes deemed major by the Dissertation Committee Chair must be submitted and approved in writing by the dissertation committee. Assuming approved procedures are followed, approval of the dissertation does not depend on the success of the project in achieving significant results.

Changes in Committee Composition

The Director of the program and the student's advisor must be notified as to any changes in the dissertation committee. Changes involving inclusion of outside members must be submitted for review to the Chair of the Dissertation Committee and the Program Director and may be subject to evaluation by the faculty. The Dissertation Committee Chair is responsible for implementing this requirement.

Requests to change the Dissertation Committee Chair along with the reason why such a request is being made, need to be submitted in writing to the Director of the Program and to the student's advisor.

Dissertation Proposal Guidelines

Below is the outline for the dissertation proposal format.

Chapter I. *Review of the Literature*

Introduce this section by providing a description of the Review section in terms of scope and topics to be covered.

Review the current literature by way of descriptive summaries and critiques of relevant research, meta-analyses, and theoretical papers. Organize the Review according to appropriate section headings. Provide an overview of the literature pertaining to the appropriateness of selected independent and dependent variables.

Summarize the most relevant aspects of the literature and critical observations as they pertain to the proposed study. This section provides a transition between the literature review, problem statement, and the research questions.

Statement of the Problem: This section should succinctly summarize the issues of concern, citing relevant research and justification for the need to study the problem. Hypotheses and/or research questions should be stated at the end of this section.

Research questions/hypotheses

Chapter II. Methods Section

The **Method** section should describe the research design and methodology of the study, including dependent and independent variables, *Participants*, *Instruments*, and *Procedures* for conducting the research.

References: Provide complete references in current APA style.

Appendices

Include any relevant materials needed to conduct the dissertation that do not fit neatly within the body of the dissertation narrative (e.g., copies of measures to be administered, questionnaires, surveys).

NOTES

1. APA style is to be followed in all aspects of the written proposal and final dissertation. See the APA Publications Manual (7th Edition) for guidance and structure.
2. The literature review should be written in past tense; however, the proposed study should be discussed in future tense.
3. Students must obtain approval from Adelphi University's Institutional Review Board prior to collecting data.

NOTE: Public Law 93-348 requires that all research projects involving human subjects be reviewed by a properly constituted review board. At Adelphi University, this is known as the Institutional Review Board (IRB). Additional information regarding the IRB, including specific forms and procedures, are available at the Office of Research and Sponsored Programs website (<https://research-grants.adelphi.edu/irb/>).

Doctoral Dissertation

All students are required to complete a doctoral dissertation under the supervision of their dissertation chair. When the dissertation chair and committee members have endorsed the dissertation as acceptable for purposes of oral examination, a dissertation examination committee is constituted. The examination committee consists of the dissertation committee plus one outside reader. Students are responsible for following timelines and completing all oral examination procedures described below. Availability of faculty to work on dissertations during the summer is at their discretion. Professor, Chair, Committee availability is not guaranteed during the summer and may be limited. Thus, students should plan accordingly.

Dissertation Evaluation Prior to the Oral Defense

After the Chair has approved the complete dissertation for distribution, copies will be given to the other dissertation committee members. When at least one committee member, in addition to the Dissertation Committee Chair, has approved the dissertation, it is strongly suggested that the outside reader also be given a copy. The committee members and outside reader may then either approve the proposal as ready to be discussed at the oral defense or require revisions prior to scheduling the defense. When all committee members (except special/student members, who are not permitted to vote), including the

outside reader, approve the dissertation as in an acceptable form for defense, the oral examination may be scheduled. All committee members must receive a copy of the proposal with revisions at least two weeks prior to the scheduled date for the oral examination.

An announcement of the oral defense, including a list of committee members, will be posted publicly and copies sent to the Program Director and the Dean/Associate Dean of the Derner School of Psychology (see Appendix J-5: Oral Defense Announcement Form). After the oral defense, the approval form signed by the dissertation chair and committee members should be submitted along with a final copy of the dissertation to the School Psychology PsyD Program Director (DCT) (Dr. Sapountzis) and Dean or Associate Dean for review. If the committee approves the dissertation, but recommends revisions of the dissertation document, submit only the approval form, then a final copy with any revisions must be prepared. After the Dissertation Committee Chair approves revisions, they must sign the final approval form and submit the completed document to the School Psychology PsyD Program Director (DCT) (Dr. Sapountzis) and Dean or Associate Dean for review. Once the School Psychology PsyD Program Director (DCT) and Dean/Associate Dean have signed off the dissertation, it can then be submitted to ProQuest for publication.

Dissertation Guidelines

Below is the outline for the dissertation proposal format.

Chapter I. Review of the Literature

Introduce this section by providing a description of the Review section in terms of scope and topics to be covered.

Review the current literature by way of descriptive summaries and critiques of relevant research, meta analyses, and theoretical papers. Organize the Review according to appropriate section headings. Provide an overview of the literature pertaining to the appropriateness of selected independent and dependent variables.

Summarize the most relevant aspects of the literature and critical observations as they pertain to the proposed study. This section provides a transition between the literature review, problem statement, and the research questions.

Statement of the Problem: This section should succinctly summarize the issues of concern, citing relevant research and justification for the need to study the problem. Hypotheses and/or research questions should be stated at the end of this section.

Research questions/hypotheses

Chapter II. Methods Section

The **Method** section should describe the research design and methodology of the study, including dependent and independent variables, *Participants*, *Instruments*, and *Procedures* for conducting the research.

References: Provide complete references in current APA style.

Appendices Include any relevant materials needed to conduct the dissertation that do not fit neatly within the body of the dissertation narrative (e.g., copies of measures to be administered, questionnaires, surveys).

Chapter III: Results Section

Chapter IV: Discussion Section

NOTES

1. APA style is to be followed in all aspects of the written proposal and final dissertation. See the APA Publications Manual (7th Edition) for guidance and structure.
2. The literature review should be written in past tense; however, the proposed study should be discussed in future tense.
3. Students must obtain approval from Adelphi University's Institutional Review Board prior to collecting data.

Appendices

Include any relevant materials needed to conduct the dissertation that do not fit neatly within the body of the dissertation narrative (e.g., copies of measures to be administered, questionnaires, surveys).

Oral Examination (Defense) Procedures

At least three weeks before the oral defense, an announcement of the defense will be communicated to all Derner faculty, serving as formal notification that the program believes you are prepared to proceed with your dissertation proposal defense.

Two Weeks Before the Dissertation Defense

Distribute final copies of the thesis to all members of the committee. This includes the reader. Per University guidelines, students will ensure that a copy of the final thesis document is available in the department for public/open access.

Following the Doctoral Dissertation Defense

1. Upon completion of the dissertation defense, the dissertation chair collects final signatures from Committee Members, Program Director, and Associate Dean or Dean, providing these signed forms to Felicia Colavito (*Graduate Studies Coordinator*), in the Dean's office.
2. Final revisions need to be submitted for Associated Dean or Dean review and signature at the latest, 2 weeks after graduation.
3. Felicia Colavito will then forward all information to the Registrar's office.
4. Felicia Colavito will also facilitate ProQuest protocol for maintaining hard and electronic copies.
5. ProQuest will process the dissertation upon completion, including binding and submitting to dissertation archives.

UNIVERSITY LIBRARIES

Swirbul Library

The Library provides users with Internet access as well as access to a variety of academic databases. There are several workstations available for word processing. The Swirbul Library holds 650,000 books, 27,000 audio-visual materials, 805,000 items in microformat, 27 special collections, and subscribes to 33,000 electronic journals and 135 electronic databases. Swirbul Library participates in the New York State and National Interlibrary Loan Program. Scholarly books, documents and copies of journal articles not owned by Adelphi (as well as dissertations from many universities) may be obtained on loan from other institutions through the interlibrary loan department. The student facilities include several small lounges for student use, and extensive computer facilities with Internet access. The library is fully accessible to handicapped students and equipment for use by the blind is available. Inter- and intra-library loan services are provided. Library hours, policies, and services are available on the Adelphi University Library website: <http://libraries.adelphi.edu>.

Online Access

Instructions for accessing online resources, including databases such as PsycInfo, are available at <http://libraries.adelphi.edu/>

Manhattan Center

Located on the second floor of 75 Varick Street in New York City, the Manhattan Center library is one of Adelphi's two off-campus libraries. The collection supports the needs of the Center's liberal arts students and its Education and Social Work programs.

Hauppauge Center

Located in Hauppauge, Long Island, students take courses in this satellite campus, which is replete with myriad academic databases, books, and other useful materials. Interlibrary loan is available at this site.

Other Libraries Available for Use by Adelphi Students

Reciprocal Borrowing Privileges at Queens College, City University of New York (CUNY), and Queens College, CUNY, participate in a reciprocal borrowing arrangement. Adelphi students may borrow circulating materials for three weeks with one renewal. If you would like to use the Rosenthal Library, simply stop at the Rosenthal Circulation Desk to obtain a borrower's card. Both the Queens College borrower's card and current validated Adelphi ID will be necessary to borrow materials from Queens College. Cards will be issued only to borrowers in good standing at Adelphi University. For further information, call Library Operations at (516-877-3518).

SERVICES FOR STUDENTS WITH DISABILITIES

The Student Access Office (SAO), located in the Ruth S. Harley University Center Room 310, is a vital campus resource. The Mission of Student Access Office (SAO) is to ensure equal access to all of the University's programs, services, and facilities for students with documented disabilities. The Office provides support services to students with learning disabilities. Documentation supporting student eligibility for assistance and for requests for reasonable accommodations is required. Disability documentation should consist of a comprehensive report that provides evidence of a currently existing impairment; background information, relevant testing, specific diagnosis, and interpretative summary.

For more information, contact: Email: sao@adelphi.edu Phone: (516) 877-3145 Fax: (516) 877-3139
TTY: (516) 877-3138

STUDENT ID

University identification cards (ID cards) are required for identification and issued to all faculty, staff, and students. ID cards are necessary for after-hours access to all residence halls, academic and administrative buildings, use of the library, and entry to sports events and all University facilities. ID cards, in general, expire at the end of each semester and must be validated by the office of the Registrar, Levermore Hall, Lower Level, for the next semester.

Where / How to Obtain an ID Card:

Location: Department of Public Safety & Transportation, ID Office, Levermore Hall

Telephone Number: 877-3500, 3438 (ext. 3500, 3438)

Hours: Monday - Friday 8:30 AM to 4:30 PM

Evenings: Monday - Thursday 4:30 PM to 7:00 PM

Summer: Monday - Thursday 8:30 AM to 7:00 PM, Friday 8:30 AM to 4:00 PM.

Students must bring proof of payment or confirmation of classes (available from the Registrar).
Replacement fee for lost or damaged ID cards: \$10.00

ATHLETIC FACILITIES

Located in Woodruff Hall, the Campus Recreation department of Adelphi University provides comprehensive athletic facilities and recreation programs, including a newly renovated fitness center, pool, indoor track, basketball/volleyball/badminton courts, and locker rooms. Visit the web site for facility hours and course schedules: <http://students.adelphi.edu/campusrec/recreation-facilities.php>

GETTING TO ADELPHI UNIVERSITY

By Train

From Manhattan, Brooklyn, and Jamaica Station

Take the Hempstead line from Penn Station in Manhattan or the Flatbush Avenue Station in Brooklyn or the Jamaica Station in Queens to the Nassau Boulevard Station. The campus is a short walk east on South Avenue. Travel time from New York City is approximately forty-five minutes.

For LIRR train schedules, please visit <http://www.mta.nyc.ny.us/lirr>. During the academic year the University offers shuttle bus services to and from the train station. The shuttle schedule can be found at: http://administration.adelphi.edu/publicsafety/traffic/campus_transportation.php

By Car

Parking is by permit only. All motor vehicles utilizing University parking facilities must display a current state registration and be registered with the University Department of Public Safety & Transportation. Students are required to register annually. With the exception of vendors servicing the University and vehicles owned by the University, no commercial vehicles are permitted to park on campus. The University assumes no responsibility for loss or damage to any vehicle parked on its property.

From Upstate New York

Take the New York State Thruway to the Tappan Zee Bridge (toward New England). After crossing the bridge, continue to I-287 east and follow signs for 1-95 south. Take 295 to the Throgs Neck Bridge. Go over the Throgs Neck Bridge, bearing right, and exit onto the Cross Island Parkway - Eastern Long Island. Take the Cross Island Parkway to the Long Island Expressway (Route 495) - Eastern Long Island. From there, follow the L.I.E. (East) directions below.

From New England

Take either I-91 south to I-95 in New Haven, or 1-684 south to 1-287 east (toward New England) to I-95 south. Depending on where you get on I-95, you may travel through Massachusetts, Rhode Island, Connecticut, and New York's Westchester and Bronx counties. Remain on I-95 and follow signs for I-295 (Throgs Neck Bridge, Eastern Long Island). Go over the Throgs Neck Bridge, bearing right, and exit onto the Cross Island Parkway- Eastern Long Island. Take the Cross Island Parkway to the Long Island Expressway (Route 495) - Eastern Long Island. From there, follow the L.I.E. (East) directions below.

From Pennsylvania

Go east on the Pennsylvania Turnpike to the New Jersey Turnpike north. Take I-95 north (New Jersey Turnpike) to Exit 13 (Goethals Bridge). After crossing the bridge, continue on the Staten Island Expressway to the Verrazano Bridge. Go over the bridge and get on the Belt Parkway (toward Kennedy Airport). Take the Belt Parkway to the Southern State Parkway. See the Southern State directions below.

From Northern New Jersey

Take I-80 east to the George Washington Bridge. Continue on I-80 east to the Cross Bronx Expressway, following signs to the Throgs Neck Bridge. Go over the bridge, bearing right, and exit onto the Cross Island Parkway - Eastern Long Island. Take the Cross Island Parkway to the Long Island Expressway (Route 495) - Eastern Long Island. From there, follow the L.I.E. (East) directions below.

From Southern New Jersey and Points South

Take I-95 north (New Jersey Turnpike) to Exit 13 (Goethals Bridge). After crossing the bridge, continue on the Staten Island Expressway to the Verrazano Bridge. Go over the bridge and get on the Belt Parkway (toward Kennedy Airport). Take the Belt Parkway to the Southern State Parkway. From there, follow the Southern State (East) directions below.

Via the Long Island Expressway (Route 495)***Traveling east***

Take the L.I.E. to Exit 34 south (New Hyde Park Road). At the first traffic light, turn right onto New Hyde Park Road. Continue south on New Hyde Park Road for 3.2 miles. Turn left onto Stewart Avenue. At the fourth light, turn right onto Nassau Boulevard. Turn left onto South Avenue (immediately after crossing the railroad tracks). The Adelphi campus is on the right.

Traveling west

Take the L.I.E. to Exit 39 south (Glen Cove Road). Travel south for four miles (the road will change from Guinea Woods Road to Glen Cove Road to Clinton Road). Turn right onto Stewart Avenue go one mile and turn left onto Hilton Avenue. Turn right onto Sixth Street (immediately after crossing the railroad tracks). Continue onto South Avenue. The Adelphi campus is on the left.

Via the Northern State Parkway *Traveling east*

Take the Northern Parkway to Exit 26 south (New Hyde Park Road). Turn right onto New Hyde Park Road. Continue south on New Hyde Park Road for three miles. Turn left onto Stewart Avenue. At the fourth light, turn right onto Nassau Boulevard. Turn left onto South Avenue (immediately after crossing the railroad tracks). The Adelphi campus is on the right.

Traveling west

Take the Northern Parkway to Exit 31 south (Glen Cove Road). Continue south on Glen Cove Road (which turns into Clinton Road) for 2.3 miles. Turn right onto Stewart Avenue. Go one mile and turn left onto Hilton Avenue. Turn right onto Sixth Street (immediately after crossing the railroad tracks). Continue onto South Avenue. The Adelphi campus is on the left.

Via the Southern State Parkway

Take the Southern Parkway to Exit 17 north (Hempstead Avenue). Continue on Hempstead Avenue traveling north. Make a left at the second traffic light (Nassau Boulevard). Continue north for 2.5 miles to the ninth traffic light. Make a right turn onto South Avenue (immediately before crossing the railroad tracks). The Adelphi campus is on the right.

Via Jericho Turnpike

Turn onto Nassau Boulevard traveling south (left turn if coming from the east; right turn if coming from the west). Pass under the railroad trestle.

Via Hempstead Turnpike

Turn onto Nassau Boulevard traveling north (right turn if coming from the east; left turn if coming from the west). Make a right onto South Avenue (immediately before crossing the railroad tracks). The Adelphi campus is on the right.

Via Old Country Road

Turn onto Franklin Avenue traveling south (left turn if coming from the east; right turn if coming from the west). Make a right turn onto Sixth Street. Continue on this road; it will turn into South Avenue. The Adelphi campus is on the left.

APPENDIXES

Appendix A: DOCTORAL PROGRAM OF STUDY

Course Sequence

First Year (24 credits)	
Fall	
0504-644 Roles and Functions of School Psychologists	3 Credits
0504-674 Tests and Measurement within a Social Justice Context	3 Credits
0503-619 Human Development	3 Credits
0503-637 Social Bases of Behavior	3 Credits
Spring	
0504-622 Statistics for School Psychologists	3 Credits
0503-835 History and Systems of Psychology	3 Credits
0504-645 Individual Differences and Special Education Exceptionalities	3 Credits
0503-733 Cognition and Affect	3 Credits

Second Year (28 credits)	
Fall	
0504-607 Intellectual Assessment I	3 Credits
0504-660 Child Psychopathology in a Social Context	3 Credits
0503-738 Individual & Cultural Differences & Identity	3 Credits
0504-708 Counseling Techniques in School Psychology	3 Credit
Spring	
0504-608 Intellectual Assessment II	3 Credits
0504-605 Personality Assessment	3 Credits
0503-723 Biological Bases of Behavior	3 Credits
0504- 601 Psychodynamic Perspectives in Working with Children	3 Credits
0504-639 Dissertation Overview	1 Credit
Summer	
0502-606 Research Design	3 Credits

Third Year (26 credits)	
Fall	
0504- 650 Case Seminar I	3 Credits
0504-627 Psychotherapy with Children and Adolescents I	3 Credits
0504-710 Principles of Behavior	3 Credits
0504-633 Psychology of Groups and Peer Dynamics	3 Credits
0504-640 Dissertation Seminar I	1 Credit
Spring	
0504- 651 Case Seminar II	3 Credits
0504-628 Psychotherapy with Children and Adolescents II:	3 Credits
0503-809 Cognitive Behavioral Techniques: Plurality and Integration	3 Credits
0504-600 Ethics in Psychology and School Psychology	3 Credits
0504-641 Dissertation Seminar II	1 Credit

Fourth Year (26 credits)	
Fall	
0504-618 Practicum in School Psychology I	3 Credits
0504-616 Consultation in School Settings	3 Credits

0504-630 Psychoeducational Interventions: Working toward Equity	3 Credits

Appendix C: Academic Calendar 2026-2027

Fall Semester 2026

Date	Description
August 24	Deadline for Students to Meet Mandatory Immunization Requirements
August 24	First day of classes - Fall 2026
August 31	Deadline for New Student Acceptance, Deposit and Enrollment
August 31	Degrees Conferred: Summer 2026
September 4	Last day to add an independent study or internship - Fall 2026
September 4	Last day to add/drop a course - Fall 2026
September 4	Last day to change a course section - Fall 2026
September 4	Last day to change course grading method - Fall 2026
September 5 - 7	Labor Day break - no classes
October 10 - 13	Indigenous Peoples Day break - no classes
October 14	Open planning begins for Spring 2027
October 28	First day of graduate registration for Spring 2027
October 30	First day of undergraduate registration for Spring 2027
November 3	Election Day - no classes
November 19	Last day to withdraw from a course - Fall 2026
November 25 - 29	Thanksgiving break - no classes
December 8	Last day of classes - Fall 2026
December 9	Makeup/Study day - no classes
December 10	Makeup/Study day - no classes

December 11 - 17	Final Exams
December 18	Emergency day

Intercession 2027

Date	Description
January 4	First day of classes - Intercession 2027
January 5	Last day to add a course - Intercession 2027
January 5	Last day to add an Independent study or internship - Intercession 2027
January 5	Last day to change a course grading method - Intercession 2027
January 5	Last day to change a course section - Intercession 2027
January 5	Last day to drop a course - Intercession 2027
January 18	Dr Martin Luther King Jr Day Observed - no classes
January 19	Last day to withdraw from a course - Intercession 2027
January 22	Last day of classes - Intercession 2027

Spring Semester 2027

Date	Description
January 25	First day of classes - Spring 2027
February 5	Last day to add a course - Spring 2027

February 5	Last day to add an Independent study or internship - Spring 2027
February 5	Last day to change a course grading method - Spring 2027
February 5	Last day to change a course section - Spring 2027
February 5	Last day to drop a course - Spring 2027
March 8	Open planning begins for Summer and Fall 2027
March 15 - 21	Spring Break - no classes
March 22	First day of registration for Summer 2027
March 31	First day of graduate registration for Fall 2027
April 2	First day of undergraduate registration for Fall 2027
April 20	Scholarship and Creative Works Conference - no classes
April 27	Last day to withdraw from a course - Spring 2027
May 12	Makeup/Study day - no classes
May 13 - 19	Final Exams
May 19	Doctoral Hooding Ceremony
May 20	Commencement Ceremony: Class of 2027

Summer Sessions 2027

Date	Description
May 27	First day of classes - Summer 2027- CONVERSION DAY - Monday classes meet
May 31	Memorial Day Observed - no classes
June 1	Last day to add an Independent study or internship - Summer I 2027

June 1	Last day to add/ drop a course - Summer I 2027
June 1	Last day to change a course grading method - Summer I 2027
June 1	Last day to change a course section - Summer I 2027
June 4	Last day to add an Independent study or internship - Full Summer 2027
June 4	Last day to add/ drop a course - Full Summer 2027
June 4	Last day to change a course grading method - Full Summer 2027

Appendix D. Academic, Financial, Health, and Personal Services at Adelphi University

Adelphi University offers comprehensive support services to all students. The Division of Student Affairs is committed to students' well-being, academic growth, and success. In addition to academics, the Division of Student Affairs assists in enriching each students' experience at Adelphi through many on- and off-campus programs, services and resources provided by nine distinct departments. The mission of the Division is to provide services, programs, and support to complement the academic experience. As student advocates, the Division promotes students' involvement, skill development, health, and well-being. This office espouses the principles of honesty, respect, and integrity, and are committed to equal access and diversity

- **Student Counseling Center (SCC)** (<https://www.adelphi.edu/scc/>). The SCC promotes the emotional and psychological growth and well-being of all students at Adelphi by providing a wide range of supportive services (self-help, group activities, group and individual therapy, referral). SCC staff is committed to providing quality care in a safe, confidential, and non-judgmental atmosphere. The SCC believes in a strengths-focused, biopsychosocial model of care that honors the fundamental dignity of each person.
- **Health Service Center (HSC)** (<https://www.adelphi.edu/health/>). The HSC promotes the lifelong physical and emotional well-being of our students. Their multi-disciplinary team provides high quality Primary Care, Health Promotion, Diet Consultation, Emergency Services, Support for Student-Athletes, Women's Issues, Wellness Education, and Health/Education/Promotion/Prevention Consultation. Same-day appointments are almost always available, and students have access to an advisory nurse 24 hours a day, 7 days a week.
- **Campus Recreation (CR)** (<https://www.adelphi.edu/campus-recreation/>). Adelphi Recreation is committed to offering safe and quality programs, facilities, and services to the university community to foster personal growth and wellness. The Campus Recreation department of Adelphi University provides comprehensive athletic facilities and recreation programs, including a newly renovated fitness center, pool, indoor track, basketball/volleyball/badminton courts, and locker rooms. Visit the AC web site for facility hours and course schedules: <http://students.adelphi.edu/campusrec/recreation-facilities.php>
- **Center for Career and Professional Development** (<https://www.adelphi.edu/career-center/>). The Center is dedicated to excellence through high levels of career and professional development service to our students across all schools, colleges, campuses, and disciplines. The intellectual growth of our students is supported by providing workshops and experiences that promote self-awareness and engagement as they identify a course of study and pursue opportunities to become contributing members of the state, national, and world communities. Through partnership with employers, alumni, faculty, and staff, students are connected to quality career development resources, internships, experiential learning, and post-graduate opportunities. Dedicated services, both online and in person, are offered to graduate students.

- **Financial Services.** Adelphi University makes financial assistance available to students based on academic merit, financial need, or diversity status. Students interested in sources of financial aid beyond the Department or Program level, including federal and private loans, may contact Student Financial Services in Levermore Hall, (516) 877-3080. A comprehensive description of financial aid may also be found on their website: <http://ecampus.adelphi.edu/sfs/>.
- **Commuter Student Services (CSS)** (<https://www.adelphi.edu/csi/commuter-students/>). CSS is located in the Center for Student Involvement and represents the interests of Adelphi University commuter students. CSS provides extensive services for students living off-campus with information and support with non-academic matters relating to the University and campus life. CSS also serves as an advocate for students and centralized resource for off-campus living. Furthermore, CSS strives to intentionally design opportunities to improve the quality of community life, foster maturation of independent life skills, promote development of responsible community members and cultivate involvement in the surrounding communities.
- **International Student Support Services (ISSS)** (<https://www.adelphi.edu/international-services/>). ISSS supports the internationalization of Adelphi University through the development and delivery of services and programs that help our international students, scholars, faculty, and staff accomplish their academic and professional goals.
- **Student Access Office (SAO)** (<https://www.adelphi.edu/access-office/>). The mission of the SAO is to enhance the Adelphi University experience for students with disabilities. Their goal is to foster a comprehensively accessible experience where individuals with disabilities have the same access to programs, opportunities, and activities as all other students. The SAO is also committed to promoting access and awareness as a resource to all members of the community. While complying with the letter of the law, the SAO also embraces its mission by providing services to all students with permanent or temporary injuries and conditions to ensure that all University programs and activities are accessible.
- **Writing Center** (<https://writing.adelphi.edu/>). The Writing Center is a free service available to all Adelphi University undergraduate and graduate students. The Center assists students from all disciplines become more effective and confident writers, and to hone critical thinking when approaching the writing process.
- **Military and Veteran Student Admissions** (<https://www.adelphi.edu/admissions/military/>). As a Yellow Ribbon School, we are dedicated to helping military and veteran students earn their degrees, and we are also cited by U.S. News & World Report 2020 as one of the “Best College for Veterans.” Adelphi University understands veterans’ unique needs; students can count on Adelphi to support them every step of the way as they pursue their next professional challenge. In addition, Adelphi is a member of the Servicemembers Opportunity Colleges (SOC) Consortium, a group of colleges and universities dedicated to helping servicemembers and their families earn college degrees. Adelphi University is also a member of the Concurrent Admissions Program (ConAP), which allows soon-to-enlist or currently enlisted military personnel to enroll in and complete college courses while they continue their service commitments. The ConAP goal is to provide an excellent experience for all

veterans and members of the military that attend Adelphi University and for each of them to know that they are an important and integral part of the University.

- **Graduate Student Council (GSC);** The Graduate Student Council (GSC) is responsible for representing and uniting the members of the graduate student body to protect, promote, and provide student input to the administration, staff, faculty, and the Board of Trustees on matters of past and future University policies. The association acts on behalf of the graduate student body through communication with the administration on matters of student concern. The Graduate Student Council of Adelphi University, in order to secure the rights of all graduate students and maintain the highest standard of student life, established and adopted the Constitution of the Graduate Student Council of Adelphi University.

Weather Hotline

In the event of inclement weather, please call to obtain information regarding delays or closings:

- Garden City Campus: (516) 877-6870
- Manhattan Center: (516) 877-6872

Public Safety: (516) 877- 3511

Registrar: (516) 877-3300

Student Financial Services: (516) 877- 3080

Student Health Services: (516) 877- 6000

The Student Access Office: (516) 877- 3145 (formerly the Office of Disability Support Services)

Student Counseling Center: (516) 877-3646

Writing Center: (516) 877- 3296

Appendix E. Professional Dispositions

Professionalism is considered an essential competency of psychology and includes honesty, integrity, accountability, responsibility, and respect for others. Students are expected to follow these competencies throughout their graduate training, and act with courtesy and respect toward others. As information becomes more widely available via social media, professional boundaries may become blurred. Many students have social networking sites/accounts (e.g., Facebook, Instagram, Twitter, Snapchat, Flickr) and email signature lines that reflect their personal preferences, opinions, and personalities. Please be mindful of the implications that online activities may have and make every effort to protect your professional image and reputation. For example, clients, externship/practicum/internship sites, and potential employers may conduct internet searches and use the resulting information in decisions regarding acceptance to programs and hiring. Significantly, legal authorities also view websites for evidence of illegal activities. Thus, students are strongly encouraged to consider the use of social media very carefully.

At all times, course communication with fellow students and faculty are to be professional and courteous. It is expected that you proofread all your written communication, including discussion posts, assignment submissions, and mail messages. Please refer to The Core Rules of Netiquette: <http://www.albion.com/netiquette/corerules.html>. Should the School Psychology Program become aware of social media activity that represents a violation of the APA or NASP Code of Ethics, local, state, or federal laws, such information may be included in the evaluation of student progress and may be grounds for disciplinary action, including remediation, or termination from the program.

Students are encouraged to consider the following cautions and suggestions when using social media:

- Please utilize privacy settings when using social networking sites (i.e., Facebook, Instagram) to limit access to personal information.
- Use discretion when considering “friend” requests. It is not advisable to become “friends” with clients, supervisors, professors, or anyone who has evaluative responsibilities for you, as a student.
- Anything written and posted by you should clearly indicate that your opinions are your own, and do not represent Adelphi University.
- Please use discretion when posting pictures or sharing videos. A good heuristic is to not post anything that involves alcohol, substance use/abuse, or inappropriate dress.
- Participation in listservs include the possibility of inadvertently writing things to a much more public audience than intended, so be cautious with posts to such forums.
- Anything written via email and/or posted via social media may exist in perpetuity and be retrievable. Be careful about what you write, post, share as it is not only retrievable, but it may be shared, forwarded, etc. to others, after which time, redacting such information is virtually impossible.
- Email is not an appropriate venue to discuss confidential information. If such communications are necessary, make every effort to ensure that any and all information is non-identifiable and include a confidentiality statement in your email.

Appendix H: Improvement Plan Notification Form

**School Psychology Doctoral Program
Adelphi University**

DATE: _____

RE: Notification of Unsatisfactory Performance in School Psychology Program

To: (Student's Name)

This letter is to inform you that your performance has been determined to be unsatisfactory in the following areas:

According to the policies outlined in the School Psychology Program Handbook, you need to schedule a meeting with your advisor to develop a School Psychology Improvement Plan. Your advisor will determine whether other program faculty needs to be involved in the Improvement Plan development.

Please schedule this meeting within 5 business days of the date of this letter.

0504-600 - Ethics in Psychology and School Psychology

PROFESSIONAL VALUES, ATTITUDES, AND BEHAVIORS*

COMMUNICATIONS AND INTERPERSONAL SKILLS*

SUPERVISION*

*embedded in externship, practicum and related clinical experiences

III. 0504-650/0504-651 – Case Seminar I and Case Seminar II - Doctoral Externship in School Psychology for a total of 6 semester hours across 2 semesters.

IV. 0504-618/0504-621 – Doctoral Practicum in School Psychology for a total of 6 semester hours.

V. 0504-619/0504-620 - Doctoral Internship in School Psychology for a total of 6 semester hours.

Appendix S: New York State Psychology Licensure

LICENSURE APPLICATION PROCESS

Below are the steps for students who wish to apply for Licensure as a Psychologist in New York State.

**Please note that the NYS psychology license is completely separate from the NYS school psychology certification, which is needed to become a School Psychologist in the NYS schools. As such, none of the information contained in this email is related to the NYS school psychology certification.*

To begin, you do not need to have graduated from an APA accredited program to apply for a NYS psychology license (herein referred to as "License").

Simply graduating from a Psy.D. program in psychology does not grant you the credentials necessary to practice as a Psychologist. You must (1) graduate from a Psy.D or Ph.D program in psychology recognized in NYS, (2) start an application for a NYS License, (3) take and obtain a passing score on the Examination for Professional Practice in Psychology (EPPP), (4) obtain post-doctoral supervision hours, (5) finish the application for the NYS License, then (6) wait for your application to be approved by the New York State Education Department before you can officially call yourself a *Psychologist* and practice psychology with all the related duties and privileges.

Below is a detailed outline of the NYS License application steps and requirements below. Please see the links in the bottom of this email to read more detailed information and to access the forms referred to below.

1. Submit an Application for Licensure (Form 1) to the NYS Department of Education Division of Professional Licensing Services with a \$294 application fee.
2. Defend your dissertation and graduate (if you have not done so already)
3. Fill out section one of the Certification of Professional Education (Form 2) then send it to the Registrar's office at Adelphi with instructions to fill out section two of the form and to send the form directly to the NYS Department of Education Division of Professional Licensing Services (you may wish to send documentation of where and when you completed your pre-doctoral internship hours so that the Registrar's office can correctly fill out Form 2 part B)
 - Note:** There are educational requirements that you must show proof of. See the [Requirements for Licensure Link](#) listed below for more information. The coursework requirements are as follows:
 - coursework in scientific and professional ethics and standards of practice, and issues of cultural and ethnic diversity (proof = courses with these names or similar names listed in your transcripts)
 - at least three semester hours or five graduate quarter hours in each of the following seven substantive content areas: biological basis of behavior; cognitive-affective basis of behavior; social basis of behavior; individual difference; psychometrics; history and systems of psychology; and research design, methodology, and statistics (proof = courses with these names/ similar names OR syllabi submitted that clearly show that these topics were covered for the required amount of semester hours)
 - one year full-time (or the equivalent two year part-time) of supervised internship (proof = your transcripts and signed Form 2 part B)
 - coursework or training in the identification and reporting of child abuse (proof = Adelphi is on the NYS register of programs who provide this training as part of the doctoral curriculum. As such, you do not need to attend any additional trainings or take any additional coursework to fulfill this requirement)

4. Order your official Psy.D. paper-based transcripts from Adelphi and have them sent directly from Adelphi to the NYS Department of Education Division of Professional Licensing Services
5. Apply for a Limited Permit (Psychologist Form 5a), once it is approved you can begin accruing post-doctoral professional experience hours
6. Complete the Report of Professional Experience (Form 4) documenting at least one year (1,750 hours) of qualifying supervised professional experiences (see the [How to Apply Link](#) in the bottom of this email for more information on what constitutes a "qualifying" professional experience and the definitions of "part-time", "full-time", and "year")
 - Note:** You may apply up to one year (1,750 hours) of *pre-doctoral* qualifying professional experiences towards the total *two year* qualifying supervised professional experiences licensure requirement. While you can apply up to one year of pre-doctoral experiences, the rest of your qualifying supervised professional experience hours must be obtained at the post-doctoral level *see item 8 for more details)
7. Take and pass the EPPP Part 1- Knowledge.
 - Note:** In order to take the EPPP you must first be deemed eligible to do so by the NYS Department of Education. You are eligible to take the EPPP once you have submitted Forms 1 and 2, AND Form 4 with at least one year (1,750 hours) qualifying professional experience documented by your pre-doctoral and/or post-doctoral supervisor(s)
8. Complete the rest of the hours needed to fulfill the *two-year* professional experience requirements. Then submit the Report of Professional Experience (Form 4) again to document the completion of your post-doctoral hours by filling out section one and having your post-doctoral supervisor complete section two and sending it directly to the NYS Department of Education Division of Professional Licensing Services.
 - Please note that only up to one year (1,750 hours) of pre-doctoral qualifying professional experiences can be applied to the overall two-year total. This means that a minimum of one year (1, 750 hours) of professional experience must be completed at the *post-doctoral level* under a Limited Permit
 - Post-doctoral hours can be completed in a variety of settings. It is your responsibility to find a post-doc position that will allow you to obtain the qualifying professional experiences necessary for licensure. It is also your responsibility to find someone to supervise your post-doctoral professional experiences. Many recent graduates find a supervisor through their workplace-- when you are interviewing for jobs, you may wish to ask the potential employer if they have someone on staff who can supervise your post-doctoral hours
9. Wait for your documentation to be verified and your License to be issued
